THE ACADEMY VENUE & FACILITIES

The courses take place in a dedicated conference and accommodation venue, designed to support both focused study and rest. Participants stay on site throughout the week, sharing meals and daily rhythms in a contained and supportive environment.

The setting encourages simplicity and presence, allowing attention to remain on the learning process while being held by the surrounding landscape and the quiet continuity of the place.

Whether you call it wormhole physics, or toroid donut science, or vortex or string theory..
the physics is clear: the universe is **MADE** only of tornados nested in symmetry.
(example: the atomic table- both electron shells, & the nucleus *ref goldenmean.info/creation*
are **JUST & ONLY** a golden ratio - platonic/ fractal NEST of vortices .. perfectly collapsing charge)..

What physics desperately needs to learn - is what **MAKES** the vortex **IMPLODE**..
and thus become **CENTRIPETAL**..
causing **-GRAVITY, LIFE FORCE, CONSCIOUSNESS, NEGENTROPY, AND ACTION AT A DISTANCE!**

The **KEY** is learning **WHERE DOES THE** ('superfluid') **CHARGE GO**
when it passes the **PLANCK THRESHOLD** ('planckphire.com') at **CENTER**
Where is the WAY OUT for charge during Infinite Compression? Mr Einstein??

This is what enables the compression / implosion to be **NON-Destructive!**
This is the question which stumped Einstein and prevented him from learning why objects fall to the ground.

THE ONLY ANSWER IS: charge implodes ('impedance matches'/ melts) into :
THE COHERENT LONGITUDINAL (& FRACTAL) EMF ARRAY
Which IS the stuff of GRAVITY WAVES (per Bearden's equations...)
.. AND the 'collective unconscious'/ 'DREAMSPELL'

Permission to enter that ARRAY- requires fractal EMBEDDING.. (key also to ensoulment at death)
which has been inaccurately called..

ENTANGLEMENT.. (action at a distance is actually caused by
phase conjugate embedding into the longitudinal ARRAY)..

Critical to see: the instantaneous universal communication of that

('portal') ARRAY / ACTION AT A DISTANCE... is that ARRAY: Golden Ratio Fractality (see 'Star Mother Kit')⁷
creates an inPHIknit nest of Golden Ratio multiples TIMES LIGHT SPEED! (Prof Ray Chiao: Golden Ratio x C)

From Dan Winter: FractalGUT.com / Planckphire.com -world's No1 'Golden TOE' are clear: gravity is caused by golden ratio implosive charge collapse, specifically because - **THROUGH** the fractal golden ratio phase conjugation tuned exactly to PLANCK (length / time) the impedance matching there allows charge to pass **THRU** this conjugate implosion point (this is the **REASON** planck is universal- **NOT** the big bang) **IN** to the fractal conjugate **COHERENT LONGITUDINAL EMF ARRAY** - which **IS** what gravity waves and the gravity grid (and the collective unconscious / dreamspell) are **MADE** of. **ONLY** permission to pass charge **IN** to that array because of precisely (Schumann /conjugate) tuned implosion **ANSWERS** Einstein's unsolved problem - **HOW** can charge collapse (gravity) be infinite non-destructive compression- **UNLESS** there is a **WAY OUT** for charge (non-destructively) specifically **THRU** that tuned center ! (that **PRECISE** implosion **IN** to that same **ARRAY** - happens **ALSO** to be demonstrably and electrically the **ONLY** way thru death - goldenmean.info/immortality physicsofsoul.com

Dan Winter & Patrick Botte - Here using Dan Winter's original discovery - using CEPSTRUM- 2nd order power spectra to measure INTERNAL coherence in EKG

The moving right/left position of this cepstrum peak- indicates the musical key signature of heart rate, when 2 Hearts Line up- the physics of empathy/entrainment are measureable- (even Tantra) also experience shows peaks near .61 are more TOUCH PERMISSIVE /'heart centered' versus peaks nearer to 1.0 are invariable more CONCEPTUAL /'head centered' emotion.

The vertical AMPLITUDE of this peaks measures AMOUNT of Heart Coherence (here also indicated for 2 persons in SIZE of the blue/red egg shape) -experience shows clearly this 'measurement of EKG becoming LASER like- is a true measure of passion, a LIE DETECTOR- and functionally measures the KINESIOLOGY (body truth) response!

Why metal fences and roofs and farms PREVENT it from raining!

"Origins of Armoring in Saharasia, c.4000 BCE. (Copyright 1996)

From Dr. DeMeo's book on the subject. DeMeo's Saharasia discovery was the result of the first-ever global geographical mapping of data on human behavior, from ethnographical sources as found in university libraries the world over."

ref- James DeMeo PhD: <http://www.orgonelab.org>

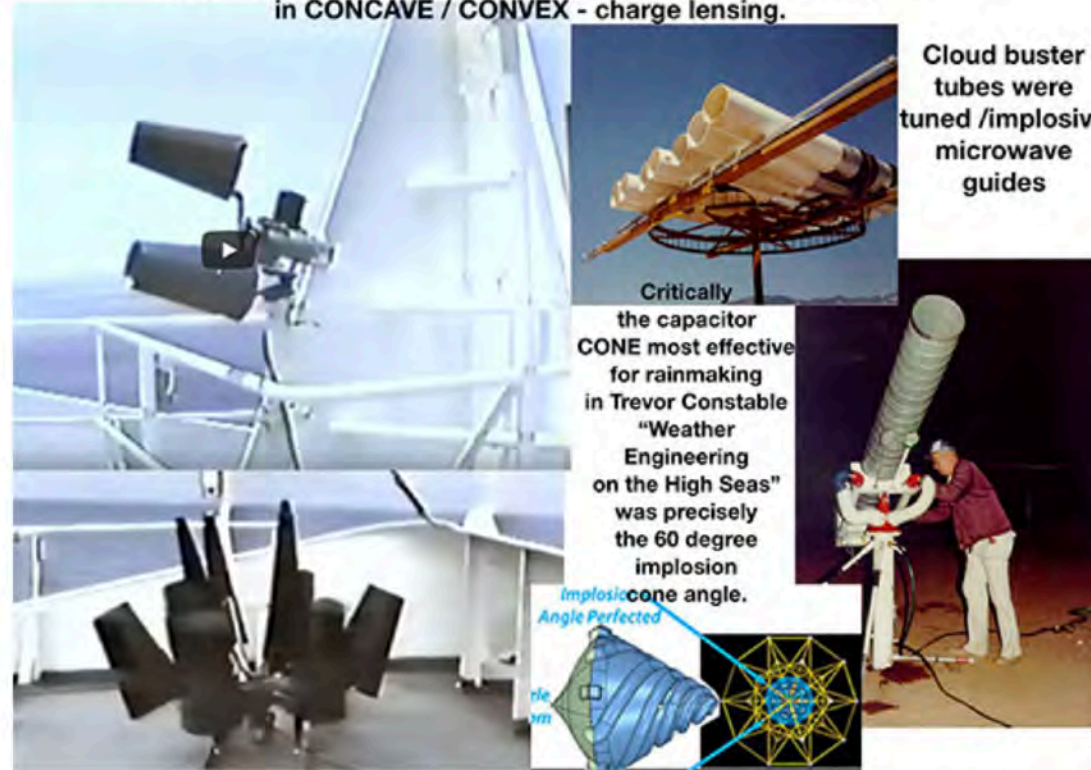

from Dan: Map the spread of laws preventing public affection,
and you map the spread of the giant desert.

The reason is - this prevents short waves from (touch!) columnating (precipitating) into long.

Ideally the capacitance of the metal concavity - should obey classic rainmaking implosive physics:

The physics of Reich's ORGONE- was actually implosive (centripetal) capacitance requiring layers of alternate hi dielectric (usually organic) - in CONCAVE / CONVEX - charge lensing.

Ideally that weak capacitive field should be tuned by measurement (flameinmind.com/lifeforce)

A prime example of tuning a concave conductor for implosion - is the copper capacitor underneath what makes agni hotra work (excerpt form my book- fractalfield.com/fractalspacetime)

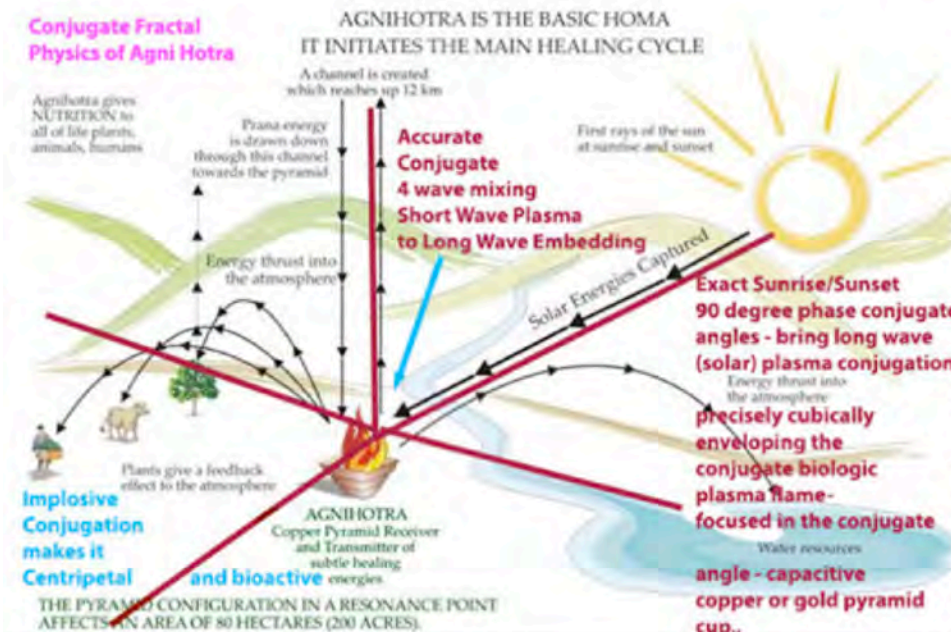

Free Preview extract from Dan Winter's new book: *Fractal Space Time*

this free preview pdf is 33 pages from the chapter on

Bioactive Field Physics of KUNDALINI
and Agni Hotra
[FractalSpaceTimeBookPreview.pdf](#)

The electric field generated in conjugate or sacred space- causes implosive / centripetal fractal attraction for charge. This creates both fertility and growth acceleration.

--example: **Agni Hotra**- the conjugate / fractal science: To understand a core principle behind the creation of sacred space- and fertility- based on phase conjugation- let us examine the physics principle - behind the well known fertility and purifying effect of AGNI HOTRA.

Then the flame is lit precisely at the 4 wave mixing accurate conjugate / perpendicular angle to the Sun of Sunrise / Sunset. The result is a massive implosive living plasma fertility and phase sorting effect. Famously those who did Agni Hotra were said much more likely to survive the nuclear holocaust in Japan. Also famously those who did Agni Hotra- were much more likely to survive the horrific Bhopal chemical disaster in India. We witnessed it first hand at an amazing farm in Poland. Here all the neighboring farms were wasteland. But on this farm- Agni Hotra had been practiced regularly for years- and the fertility effect was like 'Garden of Eden'. There was no other explanation for the difference in land fertility. We should note that in the Poland Agni Hotra rituals, a large underground copper pyramid cup- was buried fractally- beneath the small copper pyramid. I will never forget the profound 'shiver' of charge effect I felt at the precise moment of Sunset as the flame was lit. The Agni Hotra sites- are more plasma implosive / fertility inducing if they are placed at charge dense Earth magnetic line crosses. This permits more charge dense plasma containment / conjugation making the overall effect more broad spectral and centripetal (attracts life force).

[Phiray.com](#) update today - Example of using [Phirecrystal.com](#) with [Phiray.com](#) (included in Phiray special offer)

The Phirecrystal is a tuned quartz crystal designed to optimize the implosion of a phase conjugate pump wave (your breath - particularly a 10 sec mayer wave breath - is also a pump wave). The result is the mechanical piezo wave in the crystal emerges as A COHERENT DIRECTION LONGITUDINAL EMF PULSE - from the tip. Since the Phiray IS the perfect BROAD SPECTRAL phase conjugate pump wave, it can dramatically INCREASE the power of the longitudinal / compressional / 'scalar' wave emitted. By holding the crystal in the Phiray field, it is more activated. Then by pointing the crystal AT WHEREVER THS ISSUE IS IN THE BODY, that can increase the compressional/ negentropic (healing) implosion at the aiming point. IF you also hold the strong magnetic SCHUMANN coil at a perpendicular / conjugate angle to the crystal, this again increases the effect... (... and if you do this on a magnetic line cross.. and if you do this at sunrise, sunset , solstic... etc etc.. these increases of overlay perpendicularities can all increase the effect).

Many use this principle - in the presence of a hi res photo / witness (hair / nails) for remote healing.. since this coherent longitudinal interferometry is THE wave mechanics of action at a distance (Einstein called this spooky only because he had not figured out why objects fall to the ground- he did not know gravity is made of longitudinal EMF- causing centripetal charge acceleration). If you try action at a distance, again if sender and receiver are on an Earth magnetic line cross, also sunrise /sunset these things increase longitudinal embedding / coupling.

*The appalling stuck ignorance of biological science on this planet:
Our 'NO Clue to Why ANYTHING is Centripetal'
physics on Earth is so primitive.. this in effect PREVENTS life & negentropy!*

Since the book SEED OF KNOWLEDGE was published in 2005 (proving DRAMATIC growth effect from exposure to sacred stone structures) >Not only did it not occur to ANYONE that it was because the electric field created was centripetal / fractal... implosive (hint: charge collapse!) It did not even occur to them it WAS an electric field that did it! SO since the physics community did not know how or why ANY electric field effect became centripetal.. (like GRAVITY, CONSCIOUSNESS, LIFE FORCE, .. NEGENTROPY..) of course they could not conceive what a FRACTAL, IMPLOSIVE, CONJUGATE ELECTRIC FIELD WAS! AND that THIS IS HOW LIFE (AND CONSCIOUSNESS and GRAVITY) ARE CREATED!

“BioLife IS Negative Entropy-

the force that aids in building and organizing life, as opposed to **positive entropy**, the process of decay. **Negative entropy** is a part of what makes the physical body take on “**life force**” and is integral to the process of biolife. **All biological life on this planet must possess or be guided by negative entropy.**” From “Mind Body Harmony: How to Resist & Recover from Auto-Immune Diseases” by Dr Terry Willard. - chapter **PLANT ALCHEMY**.

From Dan Winter: **Understand the IMPLOSIVE FORCES that cause a plant to attract the charge called LIFE- and you will understand where the seed gets the electric capacitive field force (‘spirit’) necessary to orient an approaching water molecule- this is the CAUSE of germination!!**

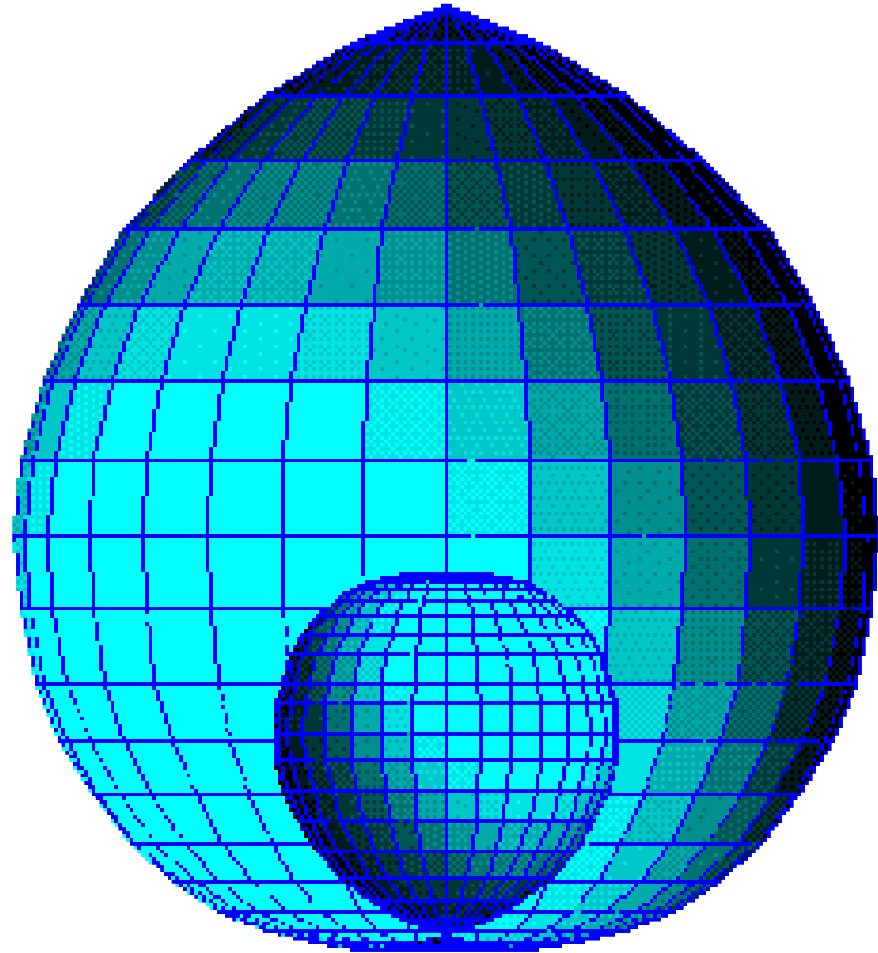

This is truly the source of apparent ‘self organization’ of biology or ‘negative entropy’. This FRACTAL INVITATION TO COMPRESS (charge) is the pure SYMMETRY PRINCIPLE OF LIFE.

This allows us to re-invent architecture & agriculture electrically.

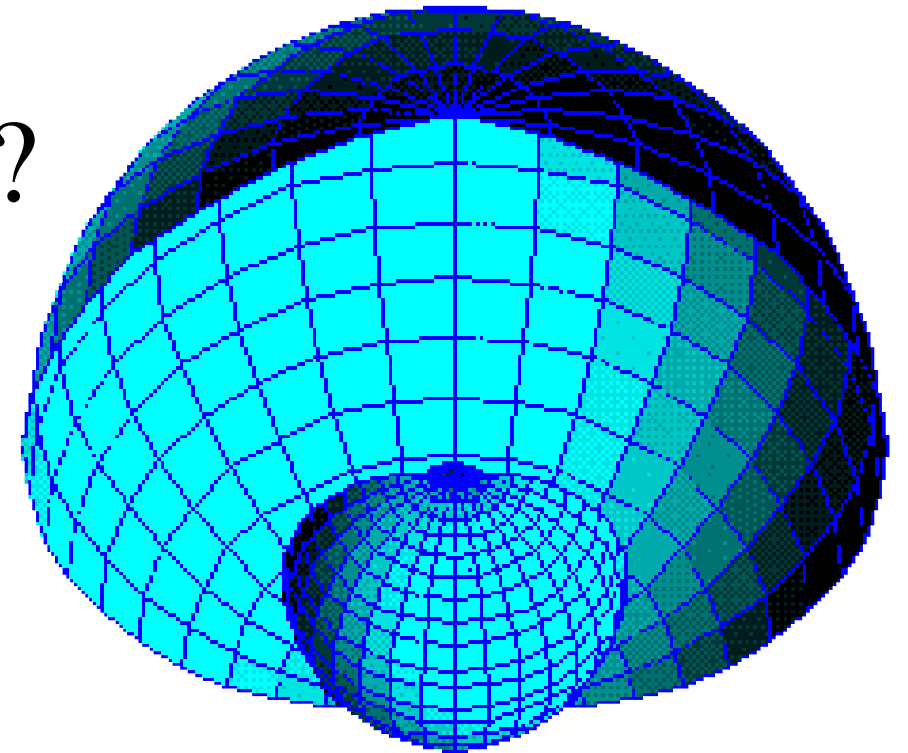

We know how to CHARGE (bliss-ignite) LIFE.

Fire your childs physics teacher now: if they are too arrogant to learn why objects fall to the ground.. and therefore what (centripetal force) holds the atomic table together!
If they are that stupid it probably means they are ALSO teaching your kids the suicidal idea that the universe is CONDEMNED to ENTROPY.. instead of correctly teaching the SAME FRACTAL CHARGE COLLAPSE WHICH CAUSES GRAVITY, CONSCIOUSNESS AND LIFE FORCE ALSO CAUSES NEGENTROPY!

Niels Bohr did not learn the principle which holds electron shells together : centripetal force CAUSED by charge collapse This is WHY electron shells AND nuclear shells are ONLY a simple platonic solid nest - www.goldenmean.info/creation - BECAUSE that is THE way to create compression/ creation in 3D using golden ratio fractal centripetal (gravity making) charge collapse : THE NO1 rated Unified field physics: www.fractalGUT.com

IS THE AMOUNT OF GRAVITY (Fractal Collapse?) CREATED BY AN ATOM - PROPORTIONAL TO HOW SELF SIMILAR ITS INSIDE (Nucleus) IS - TO ITS OUTSIDE (Electrons)?

Chemist - Moon's Work in Geometry of Atomic Nucleus - from Perfect Platonic Solids NESTING- Suggests 3D Non-Destructive Collapse =Gravity Making

(Compare to "Implosive Compression")

Platonic (cube- dodec -icos) essence of Electron Shell Geometry: Interdigitate (nest) s- p - d - f suborbitals Creates ALL Atoms. S-sub orbital: 2 electrons, 2 vortex, 1 vortex pair= 1 torus / donut

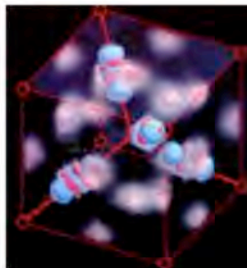

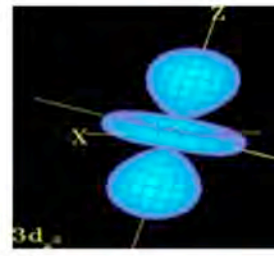

P (pi) -sub orbital: 6 electrons, 6 vortex, 3 vortex pair= 1 cube

D - sub orbital: 10 electrons, 10 vortex, 5 vortex pair= 1 dodecahedron

F - sub orbital: 14 electrons, 14 vortex, 7 vortex pair = 1 icosahedron

1 cube

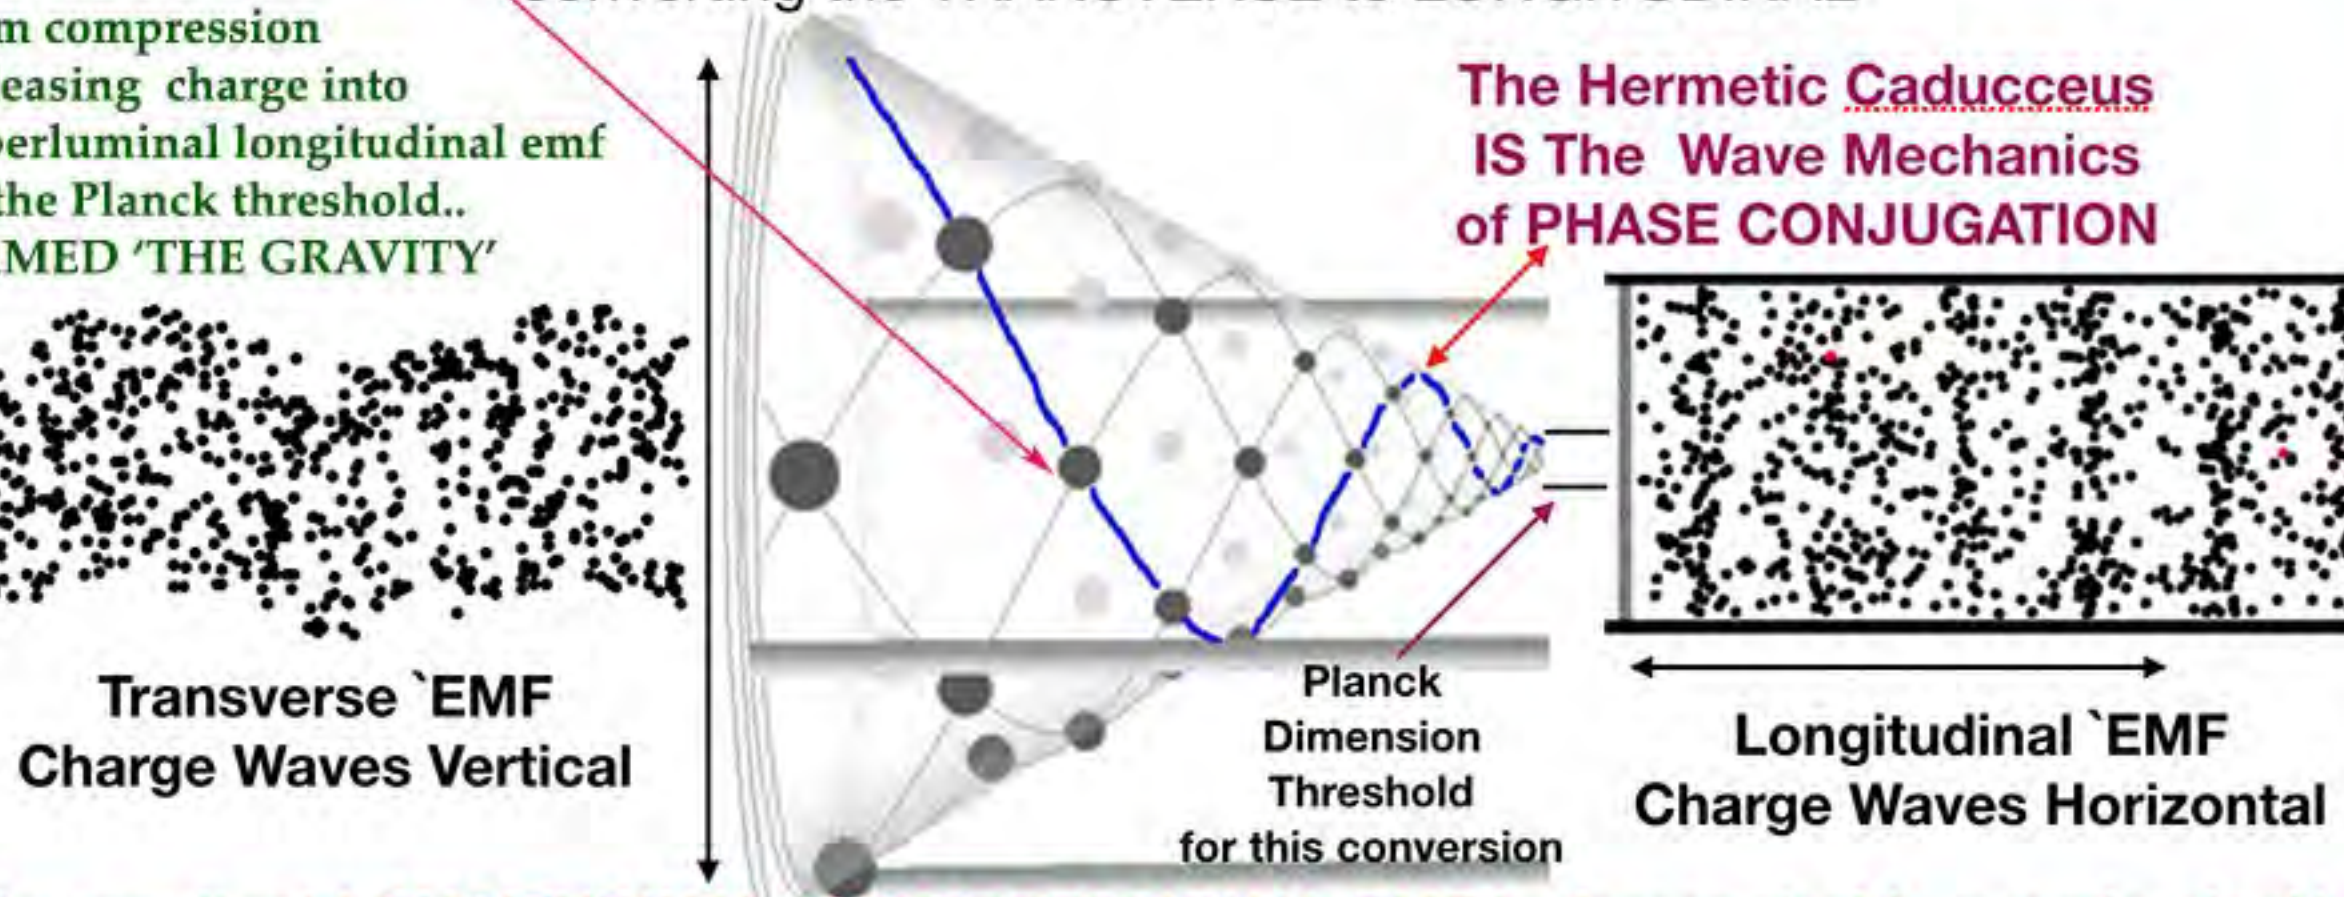

Armand Wyler: icosahedron = 7 axis of symmetry (like tetra) 5 real rotations + 2 'pseudo' rotations (mirror symmetry axis / top to bottom inside out..)

Phase conjugate fractal compression- causing gravity (and perception) becomes constructive/ implosive/centripetal. The transverse EMF inertia is translated constructively to (superluminal) longitudinal EMF.

Recursive Golden Ratio adding and multiplying ('heterodyning') of both wave lengths AND velocities creates a multiplying of wave front SPEEDS 'phase velocity' - namely acceleration- thru the speed of light. This acceleration of charge- IS - the Phenomenon called GRAVITY. Thus the symmetry of self-similarity or fractality is how gravity is CREATED because this successful heterodyning of waves produces ACCELERATION from perfected COMPRESSION (acceleration = gravity). The planck center exit point for charge (into the longitudinal array/gravity waves)- makes this compression non-destructive- exactly as Einstein knew was required - to understand gravity in a unified field.

L'addition et la multiplication ("*hétérodyne*") *récurrentes au ratio d'or* des longueurs d'onde ET des vitesses créent une multiplication des VITESSES des fronts d'onde - "*vitesse de phase*" - à savoir l'accélération - à travers la vitesse de la lumière. Cette accélération de la charge EST le phénomène appelé *GRAVITÉ*. La symétrie de l'auto-similarité ou de la fractalité est à l'origine de la gravité, car cette *hétérodyne* réussie des ondes produit une ACCÉLÉRATION à partir d'une COMPRESSION perfectionnée (*accélération = gravité*). Le *point de sortie de la charge* au centre de Planck (dans le réseau d'ondes longitudinales/ ondes de gravité) rend cette compression non destructive - exactement comme ce qu'Einstein savait être nécessaire - pour comprendre la gravité dans un champ unifié.

CONJUGAISON DE PHASE - FRACTALE / AUTO SIMILAIRE

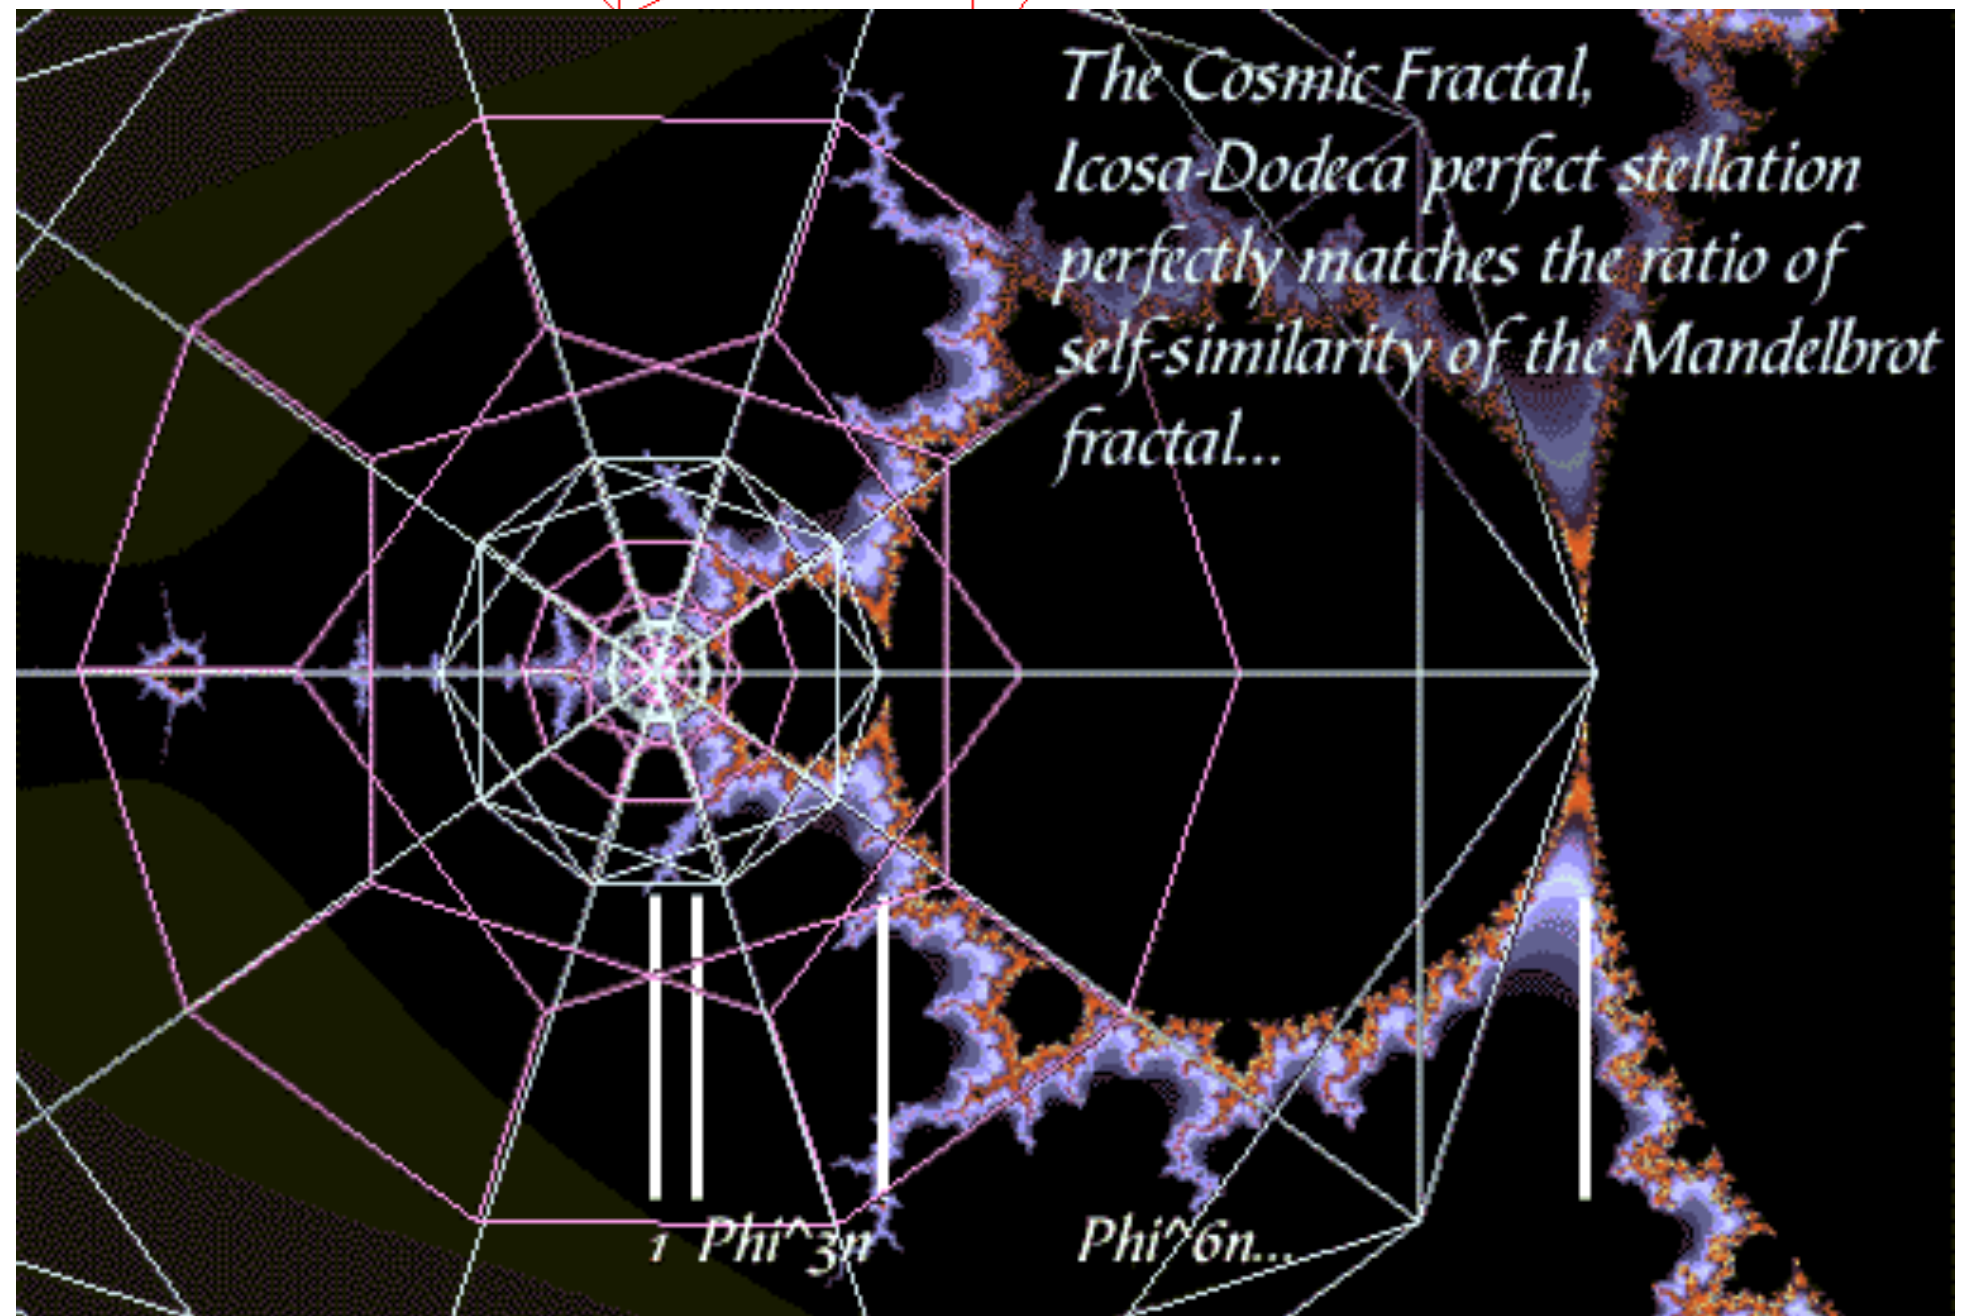

Dans une géométrie fractale quand les ondes convergent, elles peuvent se “conjuguer” (interférer/ hétérodyner) en créant des pulsations harmoniques qui s'additionnent ET se multiplient.

FRACTAL/ SELF SIMILAR - phase conjugation
when waves converge in fractal geometry, they are able to 'conjugate' or interfere/ heterodyne creating beat harmonics which add AND multiply. Golden ratio (fractal) conjugation| can make this repeating cascade of beats - constructive and therefore implosive.

La conjugaison du nombre d'or (fractale) peut rendre cette cascade répétée de battements, constructive et donc implosive.

For example, this is my physics publication showing the new **CHARGE COLLAPSE** equation newly proving the fractal geometry of hydrogen and **HOW / WHY HYDROGEN MAKES Gravity**. I showed 3 ionized hydrogen radii are precisely golden ratio exponents x Planck.

ref planckphire.com

Par exemple, voici ma publication scientifique sur ma nouvelle équation **CHARGE COLLAPSE**, prouvant nouvellement la géométrie fractale de l'hydrogène : **COMMENT/ POURQUOI L'HYDROGÈNE CRÉE LA GRAVITÉ**. J'ai montré que les 3 rayons de l'hydrogène ionisé sont précisément des exposants du nombre d'or x Planck.

Dear PHYSICIST- NO one will accept your answer that it could be a 'coincidence' that 3 hydrogen radii are precisely golden ratio exponents of PLANCK- SO - you must now deal with my answer to why: **It is because golden ratio 'conjugation' of phases is HOW HYDROGEN IMPLODES & MAKES GRAVITY**

Abstract

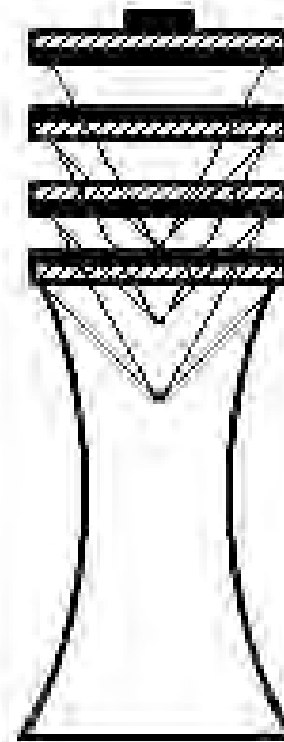

It has always been self-evident that virtually every living structure, leaf symmetry and the pent geometry of almost every living protein, uses the golden ratio for an electrical reason. Golden Ratio defines beauty in general for reasons which are also fundamental to physics. It is also self-evident, by inspection, that golden ratio solves the problem of recursive wave interference because it is the only solution to both adding and multiplying (recursive wave interference precisely turns recursive wave addition into multiplication). The authors present their new evidence of the golden ratio structure of hydrogen as one more evidence of the fundamental solution it poses to constructive wave interference, which IS constructive compression. Earlier they noted software emulation which showed golden ratio as the general solution to constructive interference. Here they show the wave-equation mathematics proof. The first set shows golden ratio is the solution to constructive compression (implosion / fusion) in a line. Then they show how that precise line of golden ratio points extends out each axis of symmetry of the pent dodeca which is the proven shape of hydrogen, DNA, Earth Grid, and the UNIVERSE. Further a model is presented for how this golden ratio causes gravity electrically: As a portion of the inertia encounters recursive constructive wave interference by golden ratio, in addition to the wave lengths, the wave phase velocities are hypothesized to heterodyne constructively recursively. This way of turning compression into (charge) acceleration is hypothesized to be the core wave mechanism of phase conjugation (apparent self-organization) and the centripetal forces of gravity, life force, color, and perception.

Dan Winter's new equation proving the phase conjugate (charge distribution perfected) life giving TIMING of our planet orbit:

Solar year = Plank time x Golden Ratio $^{241.01}$ (1.35125×10^{-43}) x ($1.618^{1/2} \times 2 \times 1.01$) = 1 yr
Venus Year = Plank time x Golden Ratio 240 (324.701 Earth days / Solar Year 365.242 = .6152 (~ Golden Ratio))

Since Time is only defined by the period of charge rotation- this shows

the **PHYSICS OF COINCIDENCE** is Charge Coupling by Conjugation

Here is Jean-Charles EEG JUST before he felt the teleportation effect. The cascade is based on ALPHA EEG base (here ~ 12hz) GREEN. Then the cascade reaching up to GAMMA (here ~ 50hz) PURPLE, has Golden Ratio (implosion) harmonics- blue lines embedded with Octave harmonics - purple lines

This means the tetra/cube octave (powers of 2) nest STABILIZES (in 'cube' 8s) the PURE IMPLOSION of the Golden Ratio cascade.

This is the SAME EEG cascade geometry we have identified in many kids 'trance' who learn to see without eyes..
 EXCEPT Jean Charles' AMPLITUDE of COHERENCE was MUCH higher ('off the charts'). His brain literally imploded!?

Voici l'EEG de Jean-Charles, juste avant d'expérimenter la sensation de téléportation. La cascade EEG est basée sur les ondes ALPHA (ici ~ 12hz) en VERT. Quand elle atteint les ondes GAMMA (ici ~ 50hz) en VIOLET, la cascade regroupe des harmoniques, basées sur le ratio d'or (implosion), lignes bleues, et l'octave, lignes violettes.

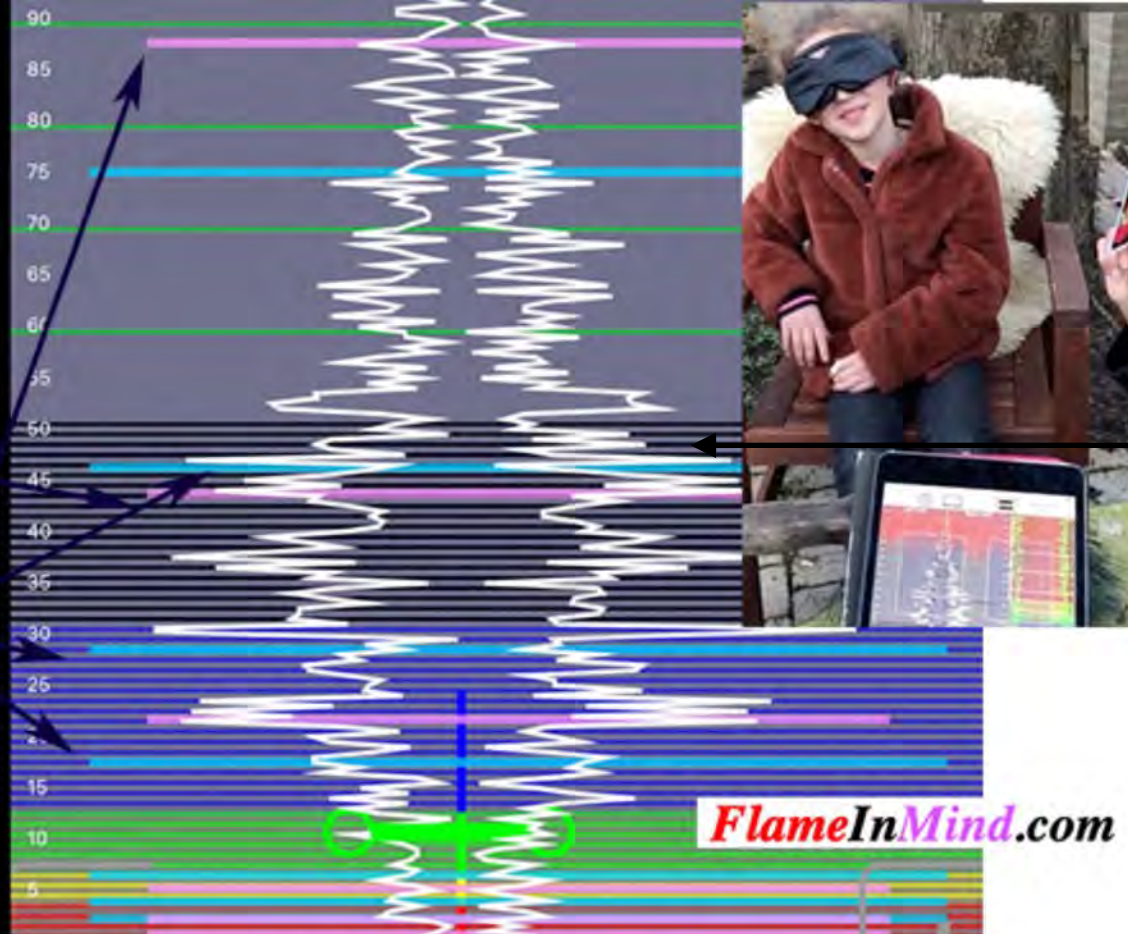

Cela signifie que le tétra/cube, basé sur l'octave (puissances de 2), STABILISE ('incube') l'IMPLOSION PURE, basée sur le ratio d'or.

C'est la MÊME géométrie/ cascade EEG que nous avons identifiée chez les enfants 'en transe', apprenant à voir sans les yeux...
 SAUF que chez Jean-Charles l'AMPLITUDE de COHÉRENCE est BEAUCOUP plus élevée ("hors-échelle").
 Son cerveau a littéralement implosé !?

BRAINWAVE Science: Third Eye, Direct Inner Vision...

We travel to 's-Hertogenbosch in the Netherlands to visit Iris Huizing. She guides children in discovering the amazing ability to perceive and directly see their surroundings (and more) without using their physical eyes. Also known as direct vision, or outer vision. They do this while wearing a mask that completely shuts off any incoming light. Really seeing without their eyes.

Vindur, the niece of Iris, is showing us her ability to do several things with a blindfold on. Patrick Botte is also here to measure the brainwave activity during this practice with the flame in mind application (craniosacral-app.com/flameinmind/). We use the brainwave feedback of this app to be able to explain the science behind this ability with the help of Dan Winter. We discuss other benefits from learning this ability and also try to learn the ability ourselves. In 2018 Iris was trained by Nicola Farmer and Since January 2019 she is a certified trainer in the ICU Awareness Program provided by Nicola's ICU Academy. (www.icuacademy.co.uk).

Scientists agree Consciousness IS the Collapse of the Wave Function

Consciousness is the collapse of the wave function

Quantum mechanics and the organic light of consciousness

Stuart Hameroff | Anesthesiologist and Quantum Consciousness Theorist and Researcher. Professor Emeritus at The Department of Anesthesiology and Center for Consciousness Studies, The University of Arizona, Tucson, *Quantum mechanics suggests that particles can be in a state of superposition - in two states at the same time - until a measurement take place. Only then does the wavefunction describing the particle collapses into one of the two states. According to the Copenhagen interpretation of quantum mechanics, the collapse of the wave function takes place when a conscious observer is involved. But according to Roger Penrose, it's the other way around. Instead of consciousness causing the collapse, Penrose suggested that wavefunctions collapse spontaneously and in the process give rise to consciousness. Despite the strangeness of this hypothesis, recent experimental results suggest that such a process takes place within microtubules in the brain. This could mean that consciousness is a fundamental feature of reality, arising first in primitive bio-structures, in individual neurons, cascading upwards to networks of neurons, argues Roger Penrose collaborator Stuart Hameroff.*

Les scientifiques s'accordent à dire que la conscience EST l'effondrement de la fonction d'onde

Penrose turned the conscious observer around. Instead of consciousness causing collapse, wavefunctions collapsed spontaneously, causing a moment – a 'quantum – of consciousness.

Consciousness and the collapse of the wavefunction

Penrose was suggesting Objective Reduction not only as a scientific basis for consciousness, but also as a solution to the 'measurement problem' in quantum mechanics. Since the early 20th century, it has been known that quantum particles can exist in superposition of multiple possible states and/or locations simultaneously, described mathematically as a wavefunction according to the Schrödinger equation. But we don't see such superpositions because, it appeared to early quantum researchers, the very act of measurement, or of conscious observation, seemed to 'collapse' the wavefunction to definite states and location - the conscious observer effect - consciousness collapsed the wavefunction. But this view put consciousness outside the purview of science. Another proposal is 'Many Worlds' in which there is no collapse, and each possibility evolves its own universe.

Penrose turned the conscious observer around. Instead of consciousness causing collapse, wavefunctions collapsed spontaneously, causing a moment – a 'quantum – of consciousness. Collapse, or quantum state reduction, occurred at an objective threshold in the fine scale structure of spacetime geometry.

While the wave-function is viewed by many as pure mathematics in an abstract space, Penrose characterized it as a process in the fine scale structure of the universe.

Penrose first likened quantum particles to tiny curvatures in spacetime geometry (as Einstein's General Theory of Relativity had done for large objects like the sun). Superposition states of multiple possibilities, or of delocalized particles, could then be viewed as opposing curvatures, and hence separations in the fine scale structure of the universe, spacetime geometry. Were such separations to continue, 'Many Worlds' would result.

But such separations would be unstable, and reduce, or 'collapse' to definite states, selected neither randomly, nor algorithmically, but 'non-computably', perhaps reflecting 'Platonic values' embedded in spacetime geometry. Thus while the wave-function is viewed by many as pure mathematics in an abstract space, Penrose characterized it as a process in the fine scale structure of the universe.

Try out my quantum mechanics course (and many others on math and science) on <https://brilliant.org/sabine>. You can get started for free, and the first

- 0:49** a wave-function for a particle that goes both left and right. This is called a superposition.
- 0:55** According to the standard interpretation of quantum mechanics such a superposition
- 1:00** means that the particle is indeed neither left nor right, but both, until you make a measurement. The
- 1:07** moment you measure the particle, you know whether it went left or right, and the wave-function
- 1:13** "collapses" to one that fits to your observation. Albert Einstein didn't like this at all. Yes,
- 1:20** that guy again. Einstein said, this collapse happens faster than light, that's a "spooky
- 1:27** action at a distance", so it has to be wrong. But Bohr said, there's nothing wrong with that,

Roger Penrose

Stuart Hamaroff

14:21 Finally let me add a brief comment about Roger Penrose and Stuart Hamaroff, who are maybe

14:26 most famous for claiming that consciousness has something to do with quantum mechanics.

14:31 Their argument however is a completely different one. It's that the collapse

14:36 of the wave-function leads to consciousness, not that consciousness leads to the collapse.

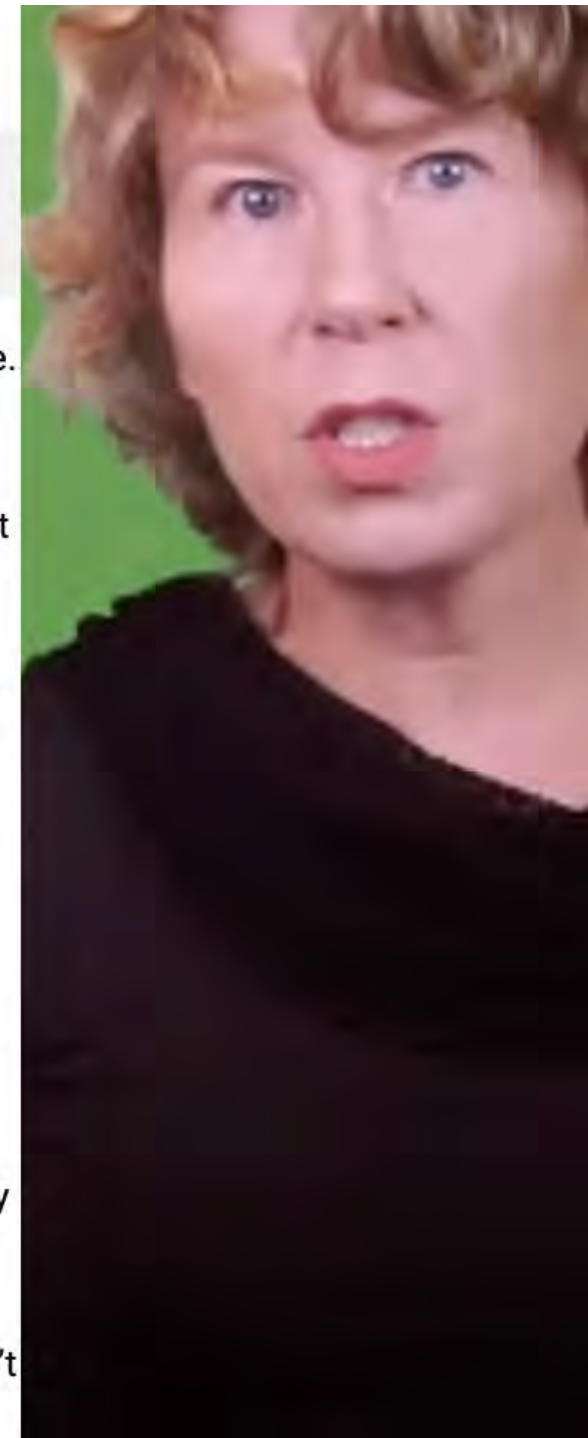

14:43 They have this idea that in the human brain there are certain large molecules, the microtubules,

14:50 that can form coherent quantum states, and their collapse is relevant for consciousness.

14:56 There are several problems with this. First of all you wouldn't expect such large molecules

15:02 to remain in quantum superpositions for a sufficiently long time in the human brain. Second,

15:07 all cells have microtubules, so how come my liver isn't also conscious? And third,

Consciousness, Cognition and the Neuronal Cytoskeleton – A New Paradigm Needed in Neuroscience

Viewing the brain as a complex computer of simple neurons cannot account for consciousness nor essential features of cognition. Single cell organisms with no synapses perform purposeful intelligent functions using their cytoskeletal microtubules. A new paradigm is needed to view the brain as a scale-invariant hierarchy extending both upward from the level of neurons to larger and larger neuronal networks, but also downward, inward, to deeper, faster quantum and classical processes in cytoskeletal microtubules inside neurons. Evidence shows self-similar patterns of conductive resonances repeating in terahertz, gigahertz, megahertz, kilohertz and hertz frequency ranges in microtubules. These conductive resonances apparently originate in terahertz quantum dipole oscillations and optical interactions among pi electron resonance clouds of aromatic amino acid rings of tryptophan, phenylalanine and tyrosine within each tubulin, the component subunit of microtubules, and the brain's most abundant protein. Evidence from cultured neuronal networks also now shows that gigahertz and megahertz oscillations in dendritic-somatic microtubules regulate specific firings of distal axonal branches, *causally modulating* membrane and synaptic activities. The brain should be viewed as a scale-invariant hierarchy, with quantum and classical processes critical to consciousness and cognition originating in microtubules inside neurons.

Is consciousness really a computation? In his book *The emperor's new mind*, Sir Roger Penrose (1989) suggested that consciousness was not entirely algorithmic, that it required a "non-computable" factor outside the brain's intrinsic neuronal computation. The only possible non-computable source, he further contended, was outside classical physics, a proposed self-collapse, or "objective reduction" ("OR") of quantum superposition states—a "collapse of the quantum wavefunction." But quantum state reduction was, and is, yet another mystery. In the early 20th century, it appeared to scientists including Niels Bohr that quantum particles could exist in superposition of multiple co-existing locations or states. But when measured, or consciously observed, superpositions would apparently "collapse," or reduce to particular states and locations. Quantum physicists John von Neumann, Eugene Wigner, and more recently Henry Stapp and philosopher David Chalmers have taken the view that conscious observation *causes* quantum state reduction, that consciousness "collapses the wavefunction" (Chalmers and McQueen, 2022). However, this view is "dualist," leaving consciousness and quantum superposition unexplained and outside science.

Rather than consciousness causing collapse, Roger Penrose took an alternate view, proposing that collapse occurred naturally, and that collapse caused consciousness. He suggested that quantum state reduction—collapse of the wavefunction—is due to an objective threshold ("objective reduction," "OR") in the fine scale structure of the universe, that such events *produced* the rudiments of phenomenal conscious experience (or "qualia").

To do so, and based on Einstein's general relativity, Penrose explained superpositions as tiny separated curvatures in spacetime geometry. Were such separations to continue, one might imagine, each spacetime curvature would evolve its own universe, as suggested in the "Many Worlds" hypothesis (Everett, 1957). However, Penrose deduced that spacetime separations would be unstable, and undergo OR based on the quantum uncertainty principle at time $t = \hbar/E_G$ ($\hbar$ is the Planck-Dirac constant, and E_G the gravitational self-energy of the superposition—(Penrose, 1989, 1996; Hameroff and Penrose, 1996a).

Real Heart Coherence Measure realheartcoherence.com

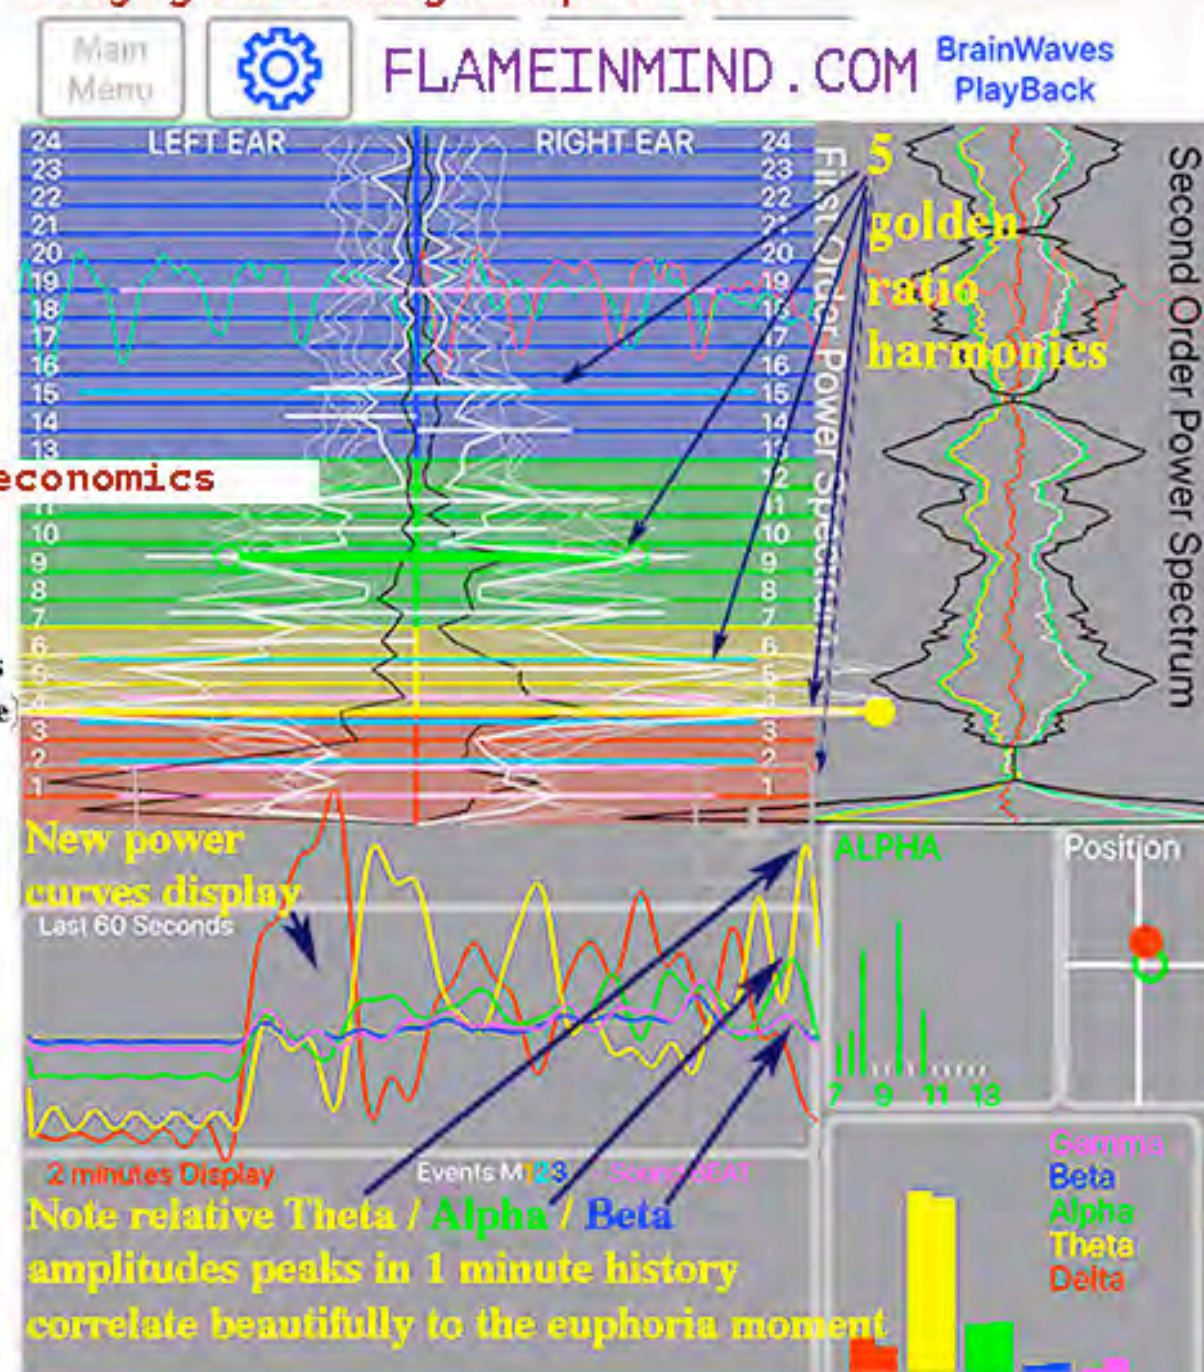

Dan Winter & Patrick Botte - Here using Dan Winter's original discovery - using CEPSTRUM- 2nd order power spectra to measure INTERNAL coherence in EKG

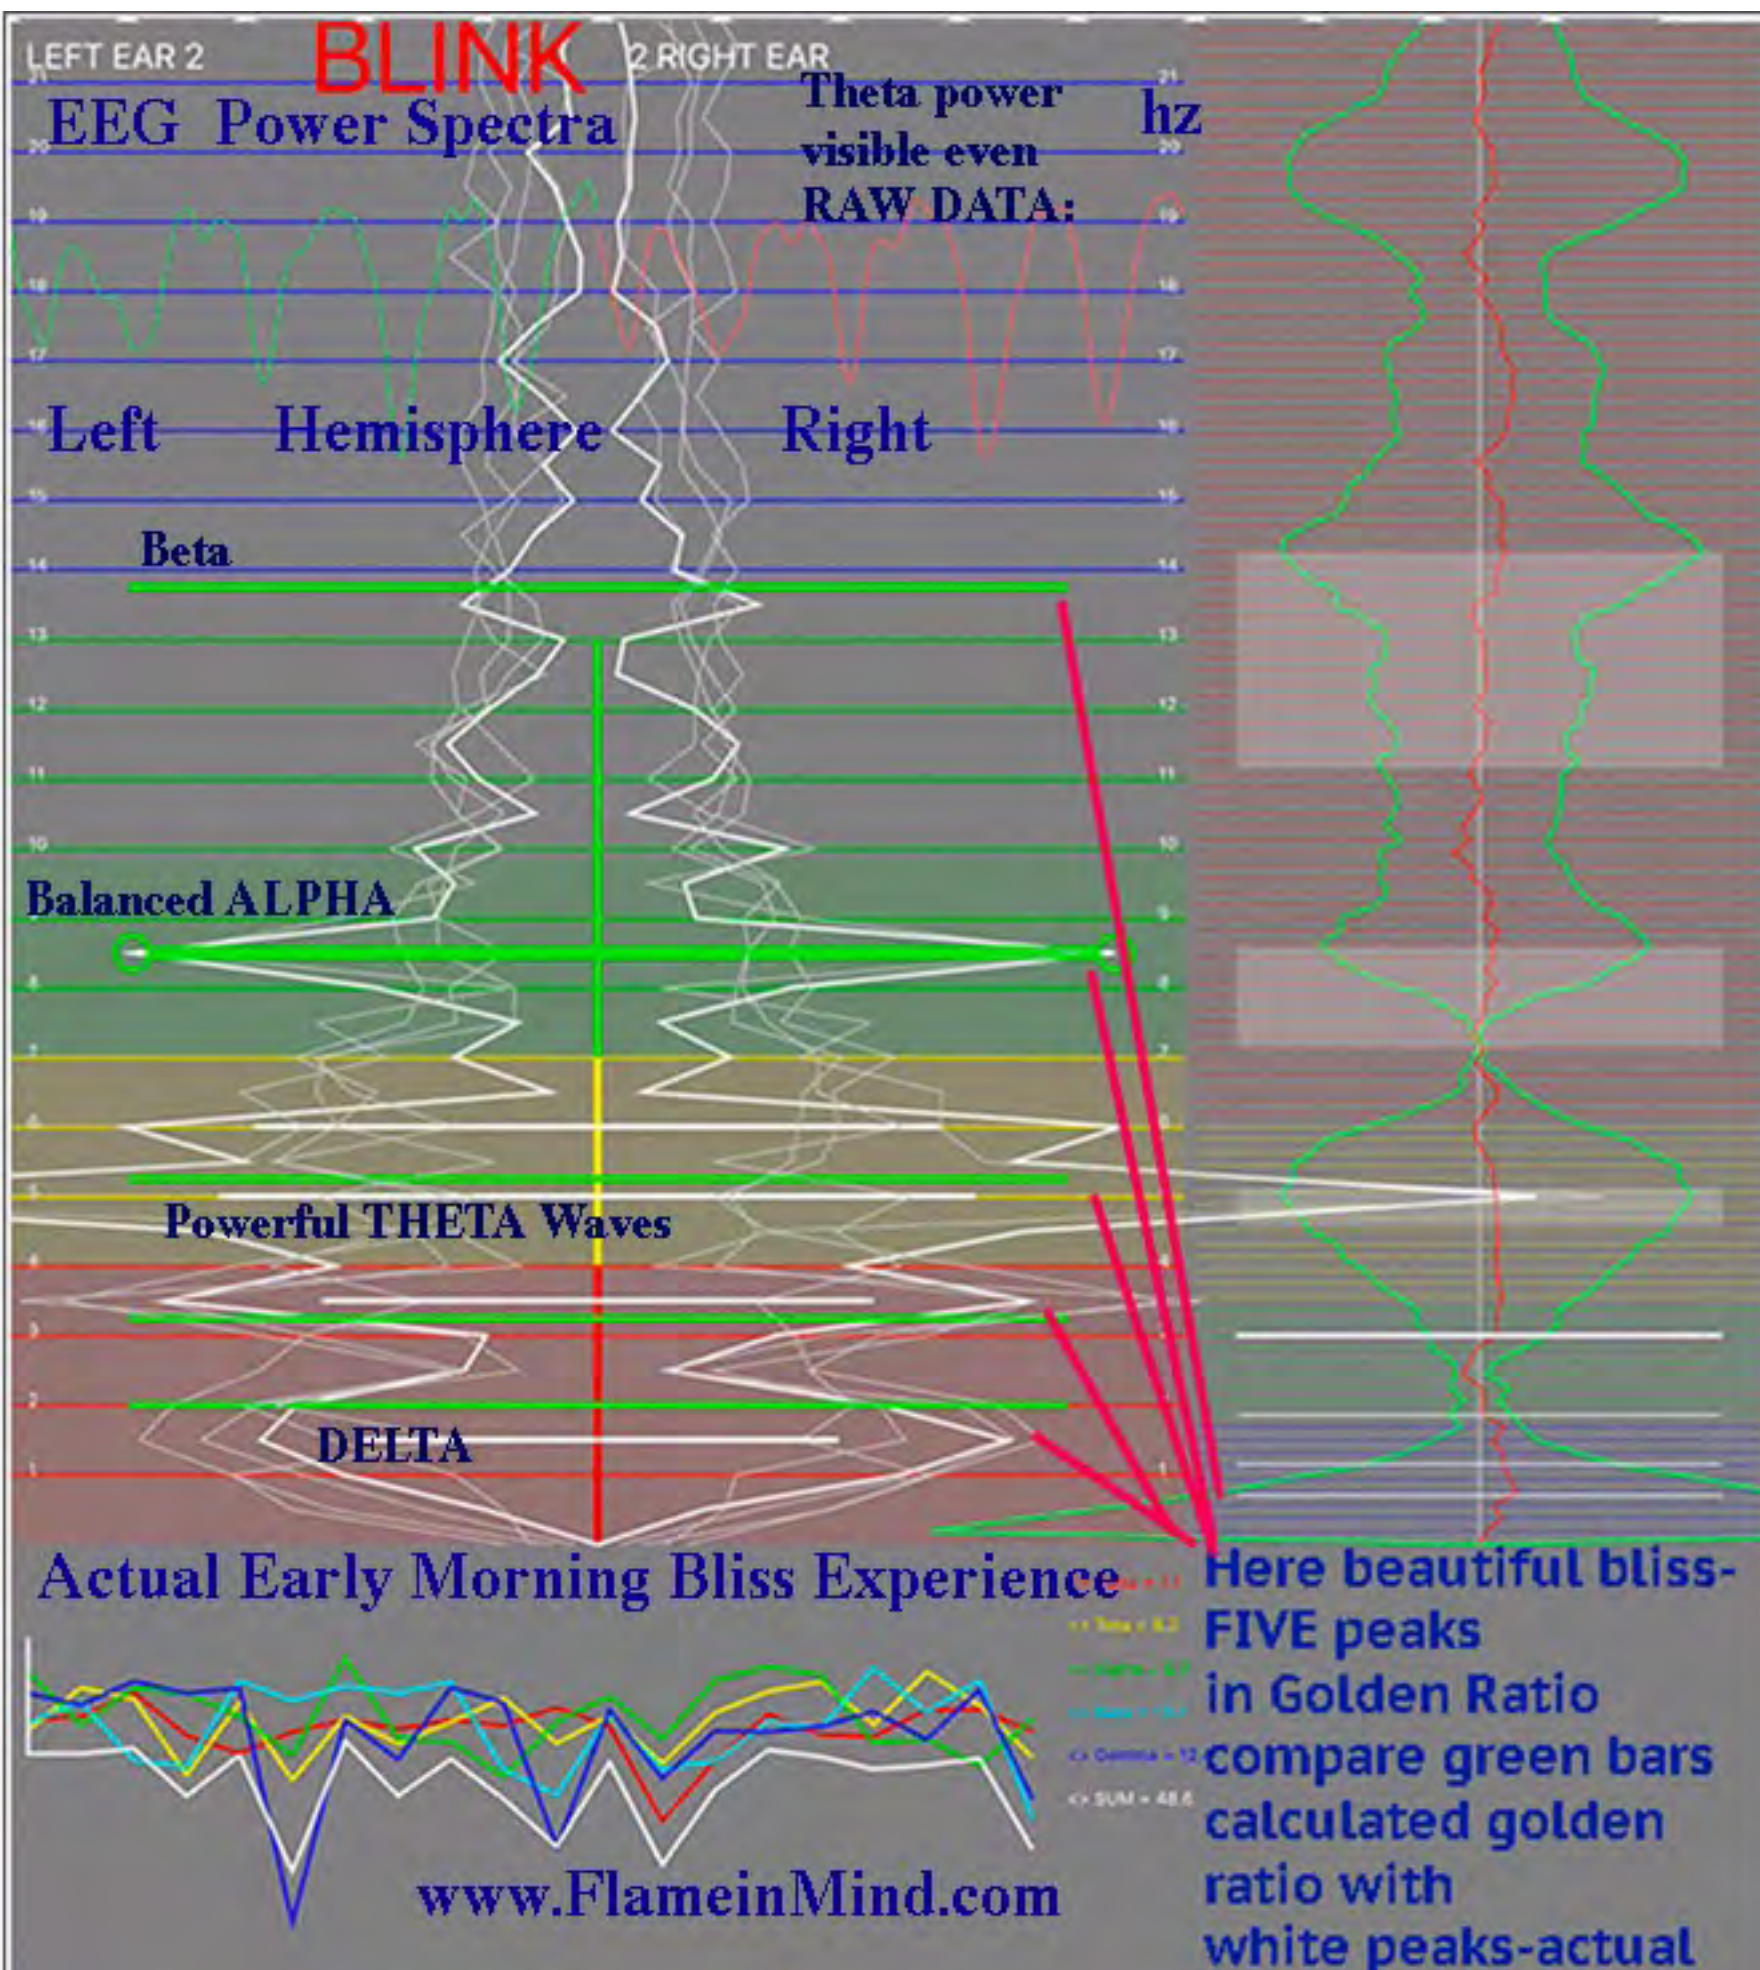

The moving right/left position of this cepstrum peak- indicates the musical key signature of heart rate, when 2 Hearts Line up- the physics of empathy/entrainment are measureable- (even Tantra) also experience shows peaks near .61 are more TOUCH PERMISSIVE /'heart centered' versus peaks nearer to 1.0 are invariable more CONCEPTUAL /'head centered' emotion.

The vertical AMPLITUDE of this peaks measures AMOUNT of Heart Coherence (here also indicated for 2 persons in SIZE of the blue/red egg shape) -experience shows clearly this 'measurement of EKG becoming LASER like- is a true measure of passion, a LIE DETECTOR- and functionally measures the KINESIOLOGY (body truth) response!

Scientists Trigger Lucid Dreams with Electrical Stimulation

An electrifying experiment led by Ursula Voss of Frankfurt University has revealed a way to artificially induce what appear to be lucid (or perhaps semi-lucid) dreams as much as 77% of the time.

By Rebecca Turner - take our free lucid dreaming course.

The method involved "zapping" the brains of non-lucid dreamers while they were asleep and dreaming. Transcranial alternating current stimulation (tACS) was applied via electrodes to the frontal cortex for 30-second periods.

The 27 subjects were awoken shortly after to provide their dream reports and rate them on a lucidity scale.

"They were really excited," said Voss. "The dream reports were short, but long enough for them to report 'Wow, all of the sudden I knew this was a dream, while I was dreaming.'"

The Gamma Sweet Spot **Lucid dreaming (& successful death) REQUIRE COHERENT LONGITUDINAL PROPAGATION**

Having tested a variety of frequencies, Voss and her team soon zoned in on the magic 40 Hz frequency (and to a lesser extent, 25 Hz) as the best trigger for inducing apparently lucid dreams.

This Gamma band sweet spot coincides with earlier research by Voss in which she detected 30-40 Hz brainwaves via EEG in experienced lucid dreamers.

The new claim is that Gamma frequencies associated with heightened awareness are fundamental to lucidity, rather than a by-product of it.

A Silver Bullet for Lucid Dreaming?

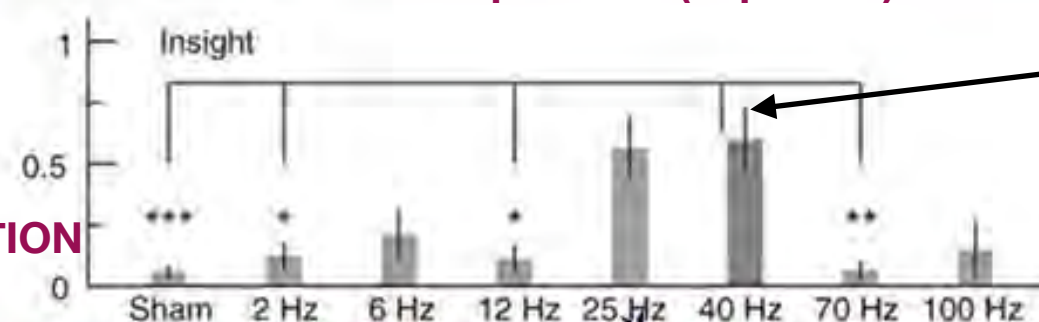

This is the first time scientists have identified a reliable way to artificially trigger heightened self awareness in dreams. Does this mean we could all tap into instant lucid dreams with a portable "brain zapper" in future?

Christian Jarrett, writing for Wired, pointed out that while the participants reported realizing they were dreaming, they were still inexperienced in handling that lucidity, as demonstrated by their average lucidity scores.

The dream subjects were asked to rate their dreams on a measurable lucidity scale, from 0 (strongly disagree) to 5 (strongly agree) for the following features:

- ◊ Feelings of insight (knowing they're dreaming)
- ◊ Dissociation (taking a third person perspective)
- ◊ Control (ability to manipulate the dream)

Le rêve lucide (ou une mort réussie) requiert une PROPAGATION LONGITUDINALE COHÉRENTE, résultant d'une compression (implosive) constructive.

Note the phase conjugate implosive frequencies by Dan's equation= 29 & 47hz

MAIRA'S REPORT- THERAPHI & CLAIRVOYANCE, LUCID DREAMING.. SYNCHRONICITIES.. BIRDS.. HEALED BUILDING..

Prolog from Dan- we have extensive science understanding how **phase conjugate embedding in plasma coheres longitudinal emf**– mechanism of lucid dreaming, and clairvoyance.. and rejuvenation .. (centripetal negentropy) even of living space.

Update below – new research study shows- lucid dream trigger frequencies (implosive collapse optimized?)

rather closely fit Dan Winter negentropy equation AND the frequencies driving Theraphi!

The idea is that the (ideally bliss triggered?) implosive compression by conjugate frequency signature in your aura–

is what enables your body/aura then to emit / propagate coherent LONGITUDINAL EMF– the coherent ARRAY of the lucid dream– AND ANCESTOR MEMORY – we believe.

MARIE CLAIRE'S MYSTICAL THERAPHI GRAIL EXPERIENCE.." A GOLDEN CUP.. HEADDRESS SUSPENDED ..BATHED MY BEING ..MOMENT OF PURE HAPPINESS..."

Testimony after a session of Theraphi

from Maire Claire.. in South France .. – 8 August 2022

"Marie Claire's Mystical Theraphi Grail Experience:"..a bell .. a golden cup, like a headdress suspended above me, encircled with small pearls, and a shower of these fine pearled drops bathed my whole being like a limpid mist: a moment of pure happiness..."

I arrived at the session in a state of general fatigue, weighed down by a stabbing pain from the day before, under my left foot, which my husband had tried to relieve with acupressure points, but from which an unpleasant memory remained.

Sitting on the chair between the two pinkish bulbs, I first examined the pictures on the cabinet in front of me. Then, very quickly, I felt the need to close my eyes in order to experience this particular treatment consciously.

Gradually, a mobile substance of a marvellous pink appeared around me, of which I perceived both the immaterial cloud and the active presence. Slowly, this substance enveloped my whole being, far beyond my physical body, and I felt truly in an ovoid cocoon-cup which dispensed soft and beneficial light to regenerate my own substance.

With gratitude, I welcomed these thousands of vaporous particles whose colour vibrated like rose quartz. A wonderfully smiling peace flowed over me and penetrated my being so intensely that at one point I felt with a flash that Theraphi was not just a machine, but an active presence that emitted with a rare fullness of love its own consciousness of existence. The words may seem excessive, but I am talking about a "vital" soul connection, in the primary sense: in the field of life. And my soul poured out in gratitude and blessing for the one or ones who had designed this healing instrument, and for her who welcomed me for this session.

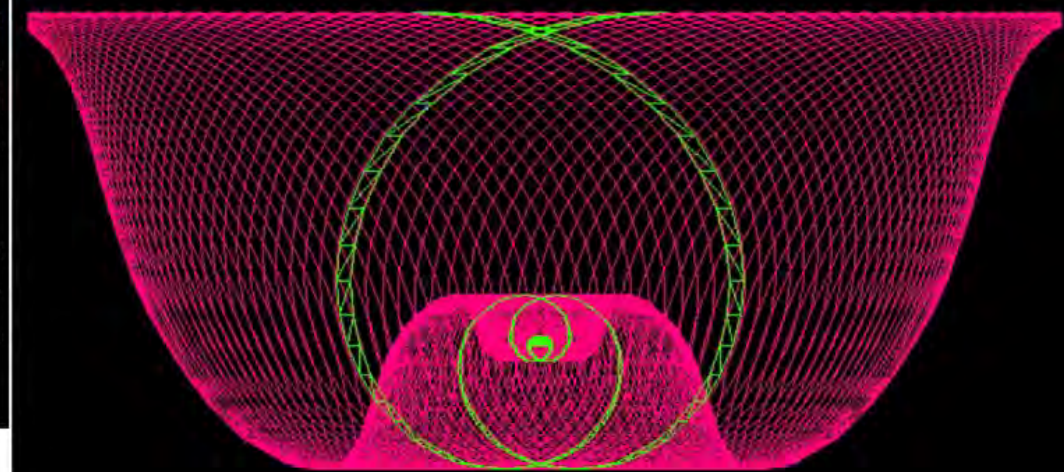

Fully awake to this immaterial perception and yet rich in other matter, the evidence of invisible presences working through Theraphi dawned on me. I could see – from within, as my eyes remained closed – pearly white oval shapes, stretching out, moving around inside this luminous egg. I perceived three of them, whose movement seemed to direct the care with their own intelligence.

And then I perceived visually with a certain astonishment like a bell descending from the distance towards me. I even thought (because I love ringing bells in the countryside): "What is it doing there? But it wasn't really a bell. When it came closer and was placed above my head, I saw (always with my eyes closed!) that it was in fact a golden cup, like a headdress suspended above me, encircled with small pearls, and a shower of these fine pearled drops bathed my whole being like a limpid mist: a moment of pure happiness, whose grace words can only poorly convey.

At the end of the session, although Theraphi had stopped, I could still feel the radiance of the light, and it took me a few minutes to dare to get up so as not to break the sacredness I perceived. Walking home, I noticed that there was no more pain in my foot, and that I had been offered a moment of total regeneration well beyond my physical body. I was breathing, tasting life, eternally new and precious. Gratitude and blessing on those who allowed it, and the whole Universe with them.

I bear witness so that, in these uncertain times, the certainty that the light is always victorious may grow. I have experienced the cosmic, spiritual power of Theraphi, and I want to help it to spread throughout humanity so that it can recover its vital forces and its splendour.

Theraphi is a powerful double conjugate acoustic modulated bioactive luminous plasma

The actual plasma tube arrangement used for this 'time reverse/rejuvenation' conjugation is depicted with remarkable accuracy in the Egyptian stone carving, It is phase conjugate, centripetal, negentropic.

This kind of strong charge field is by definition simply the electrical opposite of swelling, cyst and tumor growth. It IS this charge distribution efficiency perfected by definition- which is the electrical opposite of cancer. Theraphi – usually generates strong feelings of being energized, metabolic acceleration, circulation and sensation increase. In a large number of cases there is also a feeling of bliss/ euphoria introduced. **About 1/3 of users also report -sharpening of vision.**

Le *Theraphi* : un puissant plasma lumineux bioactif à phase conjuguée et modulation acoustique

L'arrangement actuel des tubes à plasma utilisés pour cette conjugaison "d'inversion du temps et de rajeunissement" est représenté avec une précision remarquable sur une stèle égyptienne, il est à phase conjuguée, centripète et néguentropique),

Ce type de champ de charge puissant est, par définition, tout simplement l'opposé électrique de l'inflammation, de la croissance des kystes et de tumeurs. C'EST cette efficacité de distribution de la charge - perfectionnée par définition - qui est le contraire électrique du cancer. Le Theraphi - génère généralement de fortes sensations d'énergie, d'accélération du métabolisme, d'augmentation de la circulation et des sensations. Dans un grand nombre de cas, un sentiment de béatitude/euphorie est également introduit. **Environ 1/3 des utilisateurs signalent également une amélioration de la vision.**

TheraPhi - Plasma Healing Field Technology -

is a powerful centripetal broad spectra phase conjugate field (both plasma/optical and ELF)

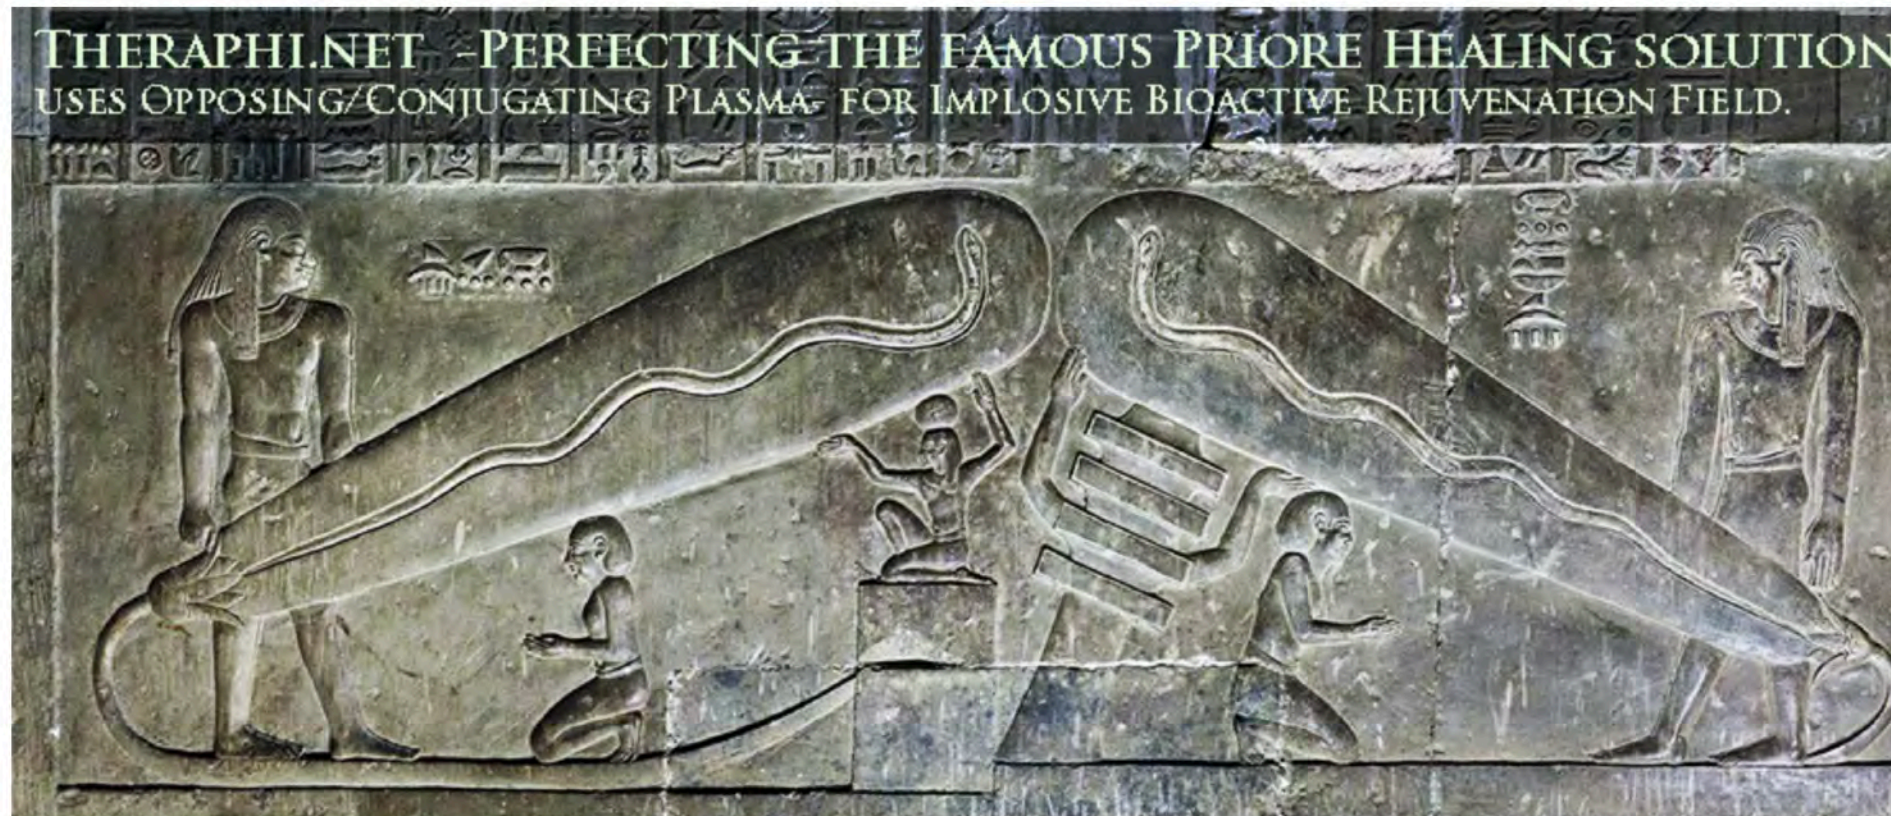

based on the famous PRIORE device- the net effect was a highly stimulating and healing and rejuvenating to most cellular life.

Our TheraPhi Plasma Healing light field device- is inspired by the origin Priore device (see below) from France.

However- our hardware and implementation is entirely new and updated. The primary difference is our group, Implosion Group has discovered the PRINCIPLE of how the Priore device worked (unknown at the time).

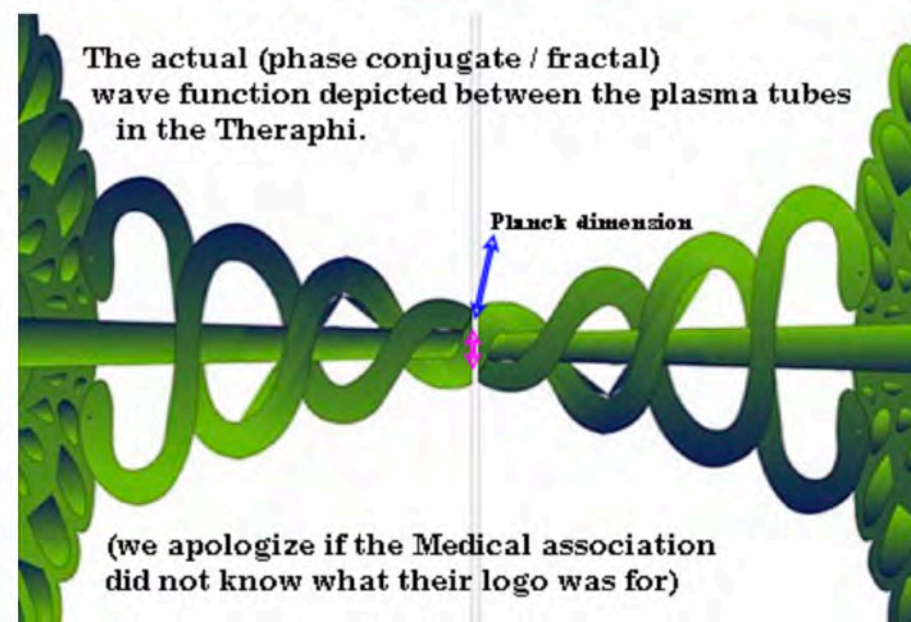

That principle - is broad spectral phase conjugation- the ["Origin of Biologic Negentropy"](#)- the entire physics which is [Dan Winter's new book](#) by that title (more below).

This new Implosion Physics specifically predicts precisely all the frequencies and phase relationships used in the TheraPhi.

controls not subjected to the same treatment.

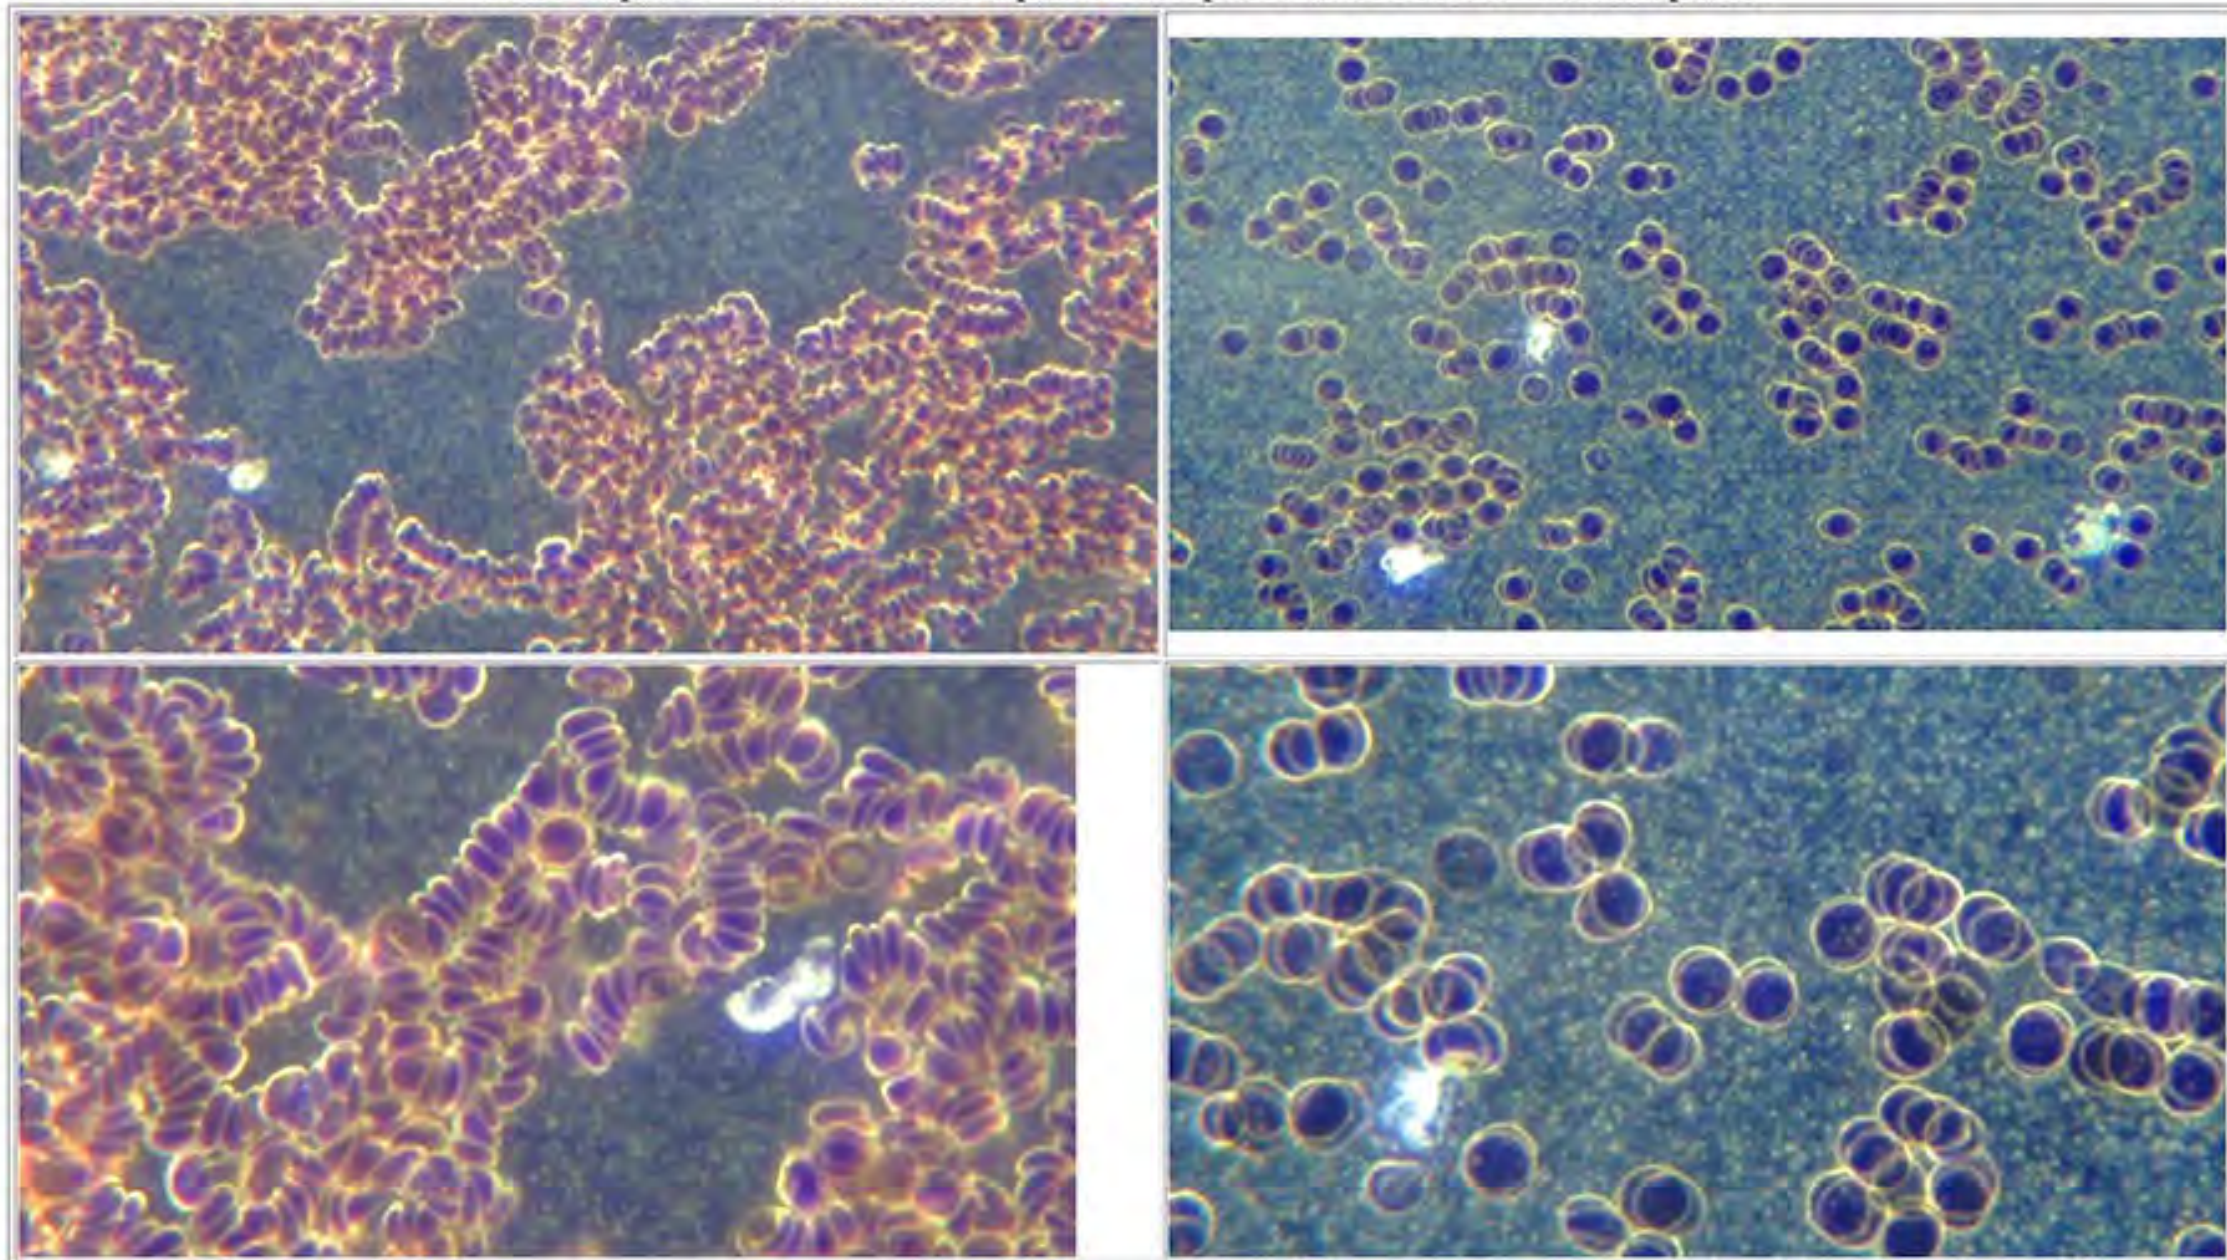

He got similar results for tulips, asparagus and others

- note this bood plasmoid motility (life force? / MICROZYMAS) - does appear nourished by Theraphi plasma exposure.
- preliminary reports are strongly suggestive- those with strong Microzymas / Somatid motility are far less susceptible to infection.. viral etc.. (see Anton Bechamp - [Microzymas link](#))
- our team is convinced most vaccinations radically decay healthy live blood plasmoids (Microzymas/ Somatids-visible and measureable)
- and are actively collaborating with medical teams to prove this.

WATER & AGRICULTURE

The Theraphi system can also be used to structure water for improved hydration. This water can be used for drinking or for agriculture. Treating seeds prior to planting can also have significant results in terms of enhanced plant growth. Experiments conducted with similarly plasma activated water in the Netherlands are explained in the TEDxArnhem video on the [How it Works page](#). Initial experiments done locally with growing vegetables the Theraphi also indicate beneficial results. Three sets of seeds were planted of each different kind of seed. One set was control – organic seeds watered as usual. The other set was organic seeds watered with Theraphi'd water. The third set is organic Theraphi'd seeds watered with normal water. (Note this is all spring water). The results are described below.

AFTER 2 WEEKS

In each case the control seeds sprouted last, the Theraphi'd seeds/water ones sprouted a few days in advance. In each case after two weeks the Theraphi'd ones are ahead in growth.

AFTER 3 WEEKS

All sets of seeds showed similar results as per the photograph of the sunflower sprouts on the left. The left of Theraphi'd seed is tallest growth. The right of Theraphi'd water is next tallest. The middles is the control.

AFTER 4 MONTH

The difference is most notable in sugarbeans. Note how small the sugarbean shoot is on the control one on the left, compared to the height of growth for the theraphi'd ones on the right. Also big difference in how long it takes for carrot seeds to germinate. Theraphi water on left and theraphi seeds on right and control in middle. Sunflowers also respond brilliantly to being theraphi'd.

AFTER 5 WEEKS

Sunflowers have been transplanted to vegetable garden. Below left image: Theraphi seeds and watered sugarbeans are ready to transplant. Control sugarbeans still sprouting. Below right image: For carrots - the Theraphi seeds (in left tray) and Theraphi water (middle tray) are

Transverse Wave -

The axis of vibration/ movement is perpendicular/ 'vertical' to the direction of propagation

- most electromagnetic communication use this exclusively
- in Earthquakes called S waves
- cannot implodively compress.

Longitudinal Waves -

The axis of vibration/ movement is parallel/ 'horizontal' to the direction of propagation.

- Sound waves, - Earthquake P waves

vs conjugate longitudinal EMF which can contain heat at a distance, this points to how mind waves work, naturally includes the superluminal, and can penetrate most barriers.

- These waves can implode - and achieve remote action, & *plasma containment* - the holy grail of all fusion physics, AND the nature of MIND itself !

Ondes transversales -

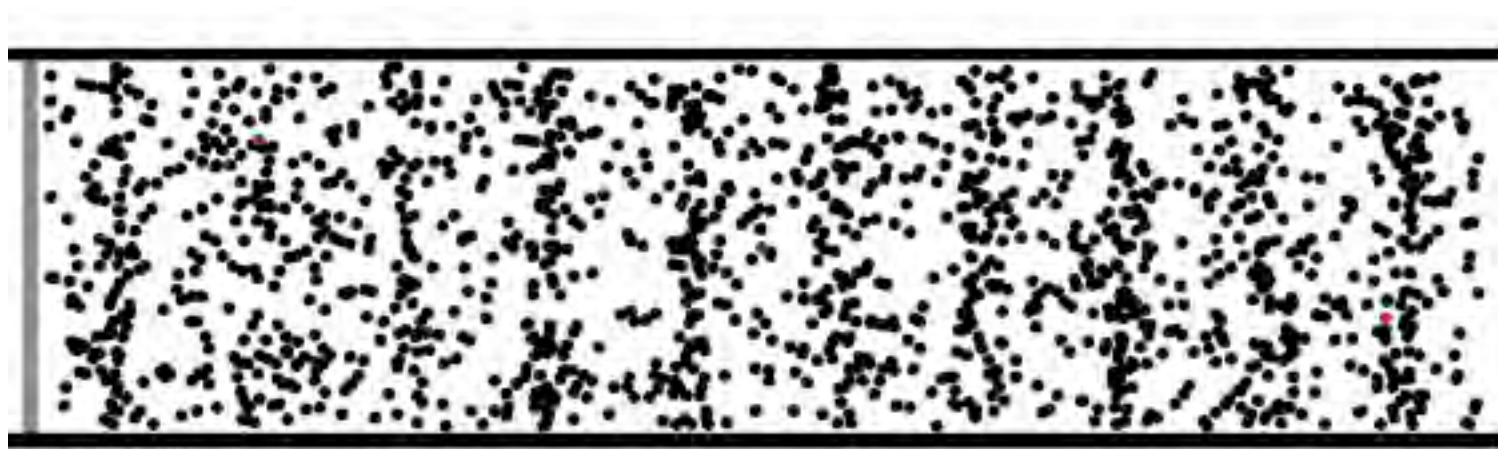

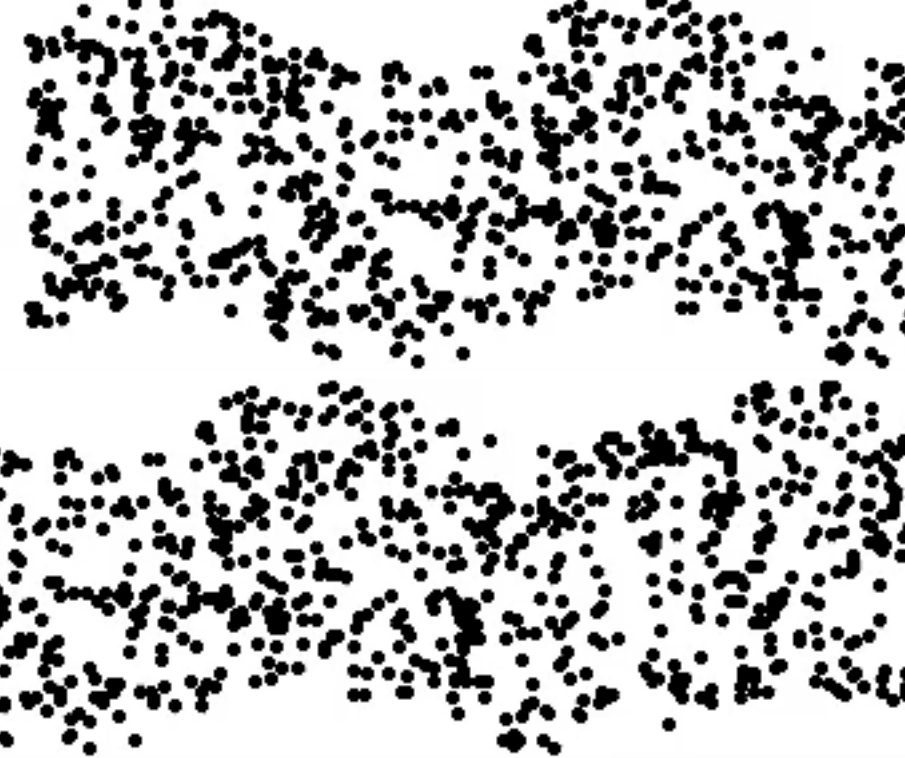

L'axe de vibration/ mouvement est perpendiculaire ou “*vertical*” à la direction de la propagation.

- appelées *ondes S* dans les tremblements de terre
- la plupart des communications électromagnétiques utilisent ce type d'ondes exclusivement
- ne peuvent se comprimer de manière implosive

Ondes longitudinales -

L'axe de vibration/ mouvement est parallèle/ “*horizontal*” à la direction de la propagation.

- appelées *ondes P* dans les tremblements de terre
- les ondes sonores sont principalement longitudinales
- par opposition aux *champs électro-magnétiques longitudinaux*, conjugués, qui peuvent contenir la chaleur à distance, et sont indicateurs de comment les ondes cérébrales flameinmind.com fonctionnent, incluant naturellement le supraluminique capable de pénétrer la plupart des barrières.
- Ces ondes peuvent imploser, réaliser une action à distance, & *contenir le plasma* (Graal de la physique de fusion....) ET clé de la nature de l'ESPRIT !

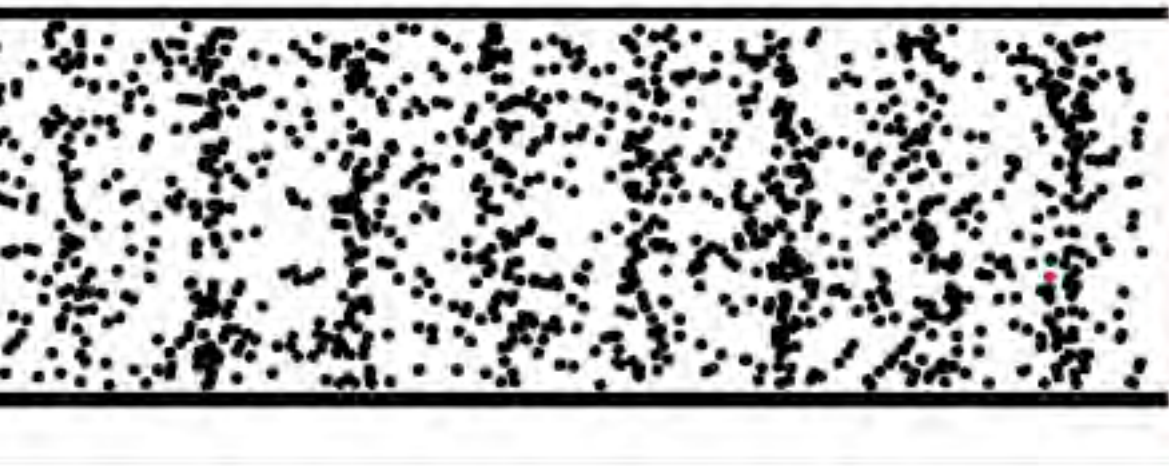

Longitudinal Wave

Interferometry:

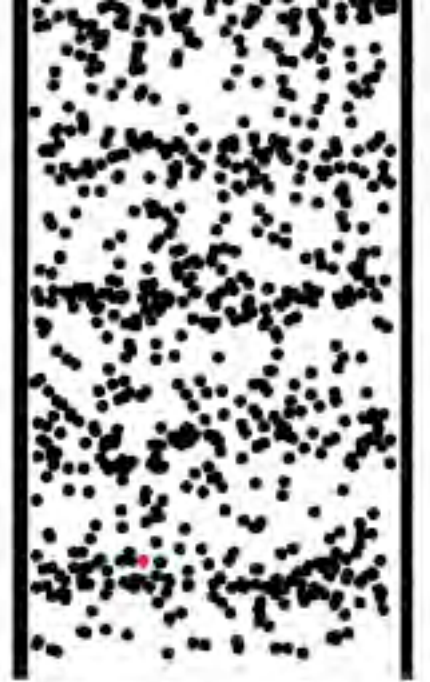

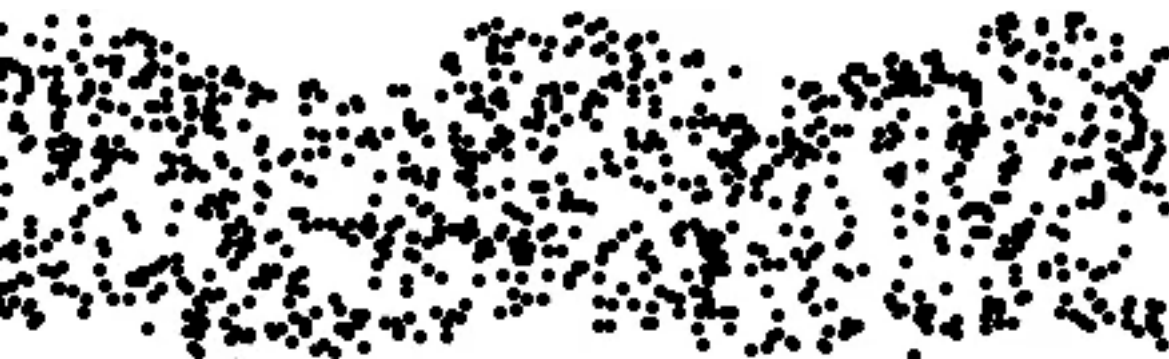

Plasma Containment.

Only longitudinal waves can make symmetrical compression / implosion (transverse waves cannot, because they don't squeeze the center).

The Compression/Rarefaction wave travels **PARALLEL** to the direction of travel.

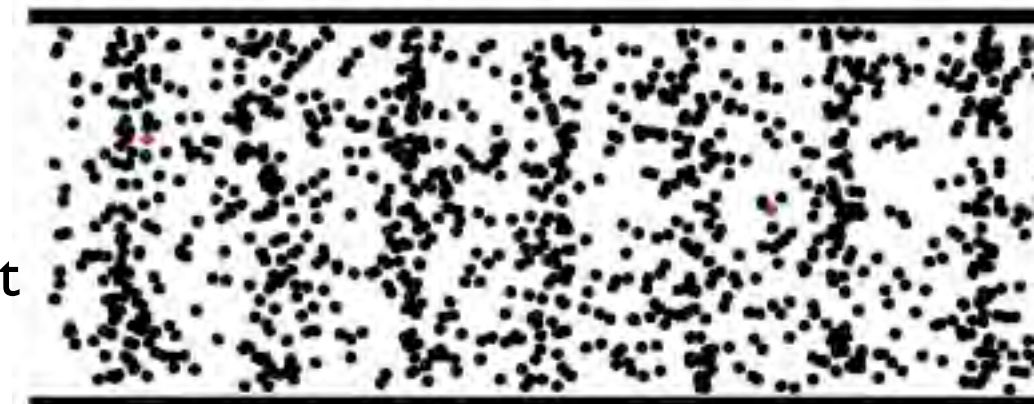

Transverse emf waves vibrate **PERPENDICULAR** to the direction of propagation. When this hits an atom/ nucleus it is obvious this could never 'squeeze'/ compress implosively toward center!

The Nature of MIND

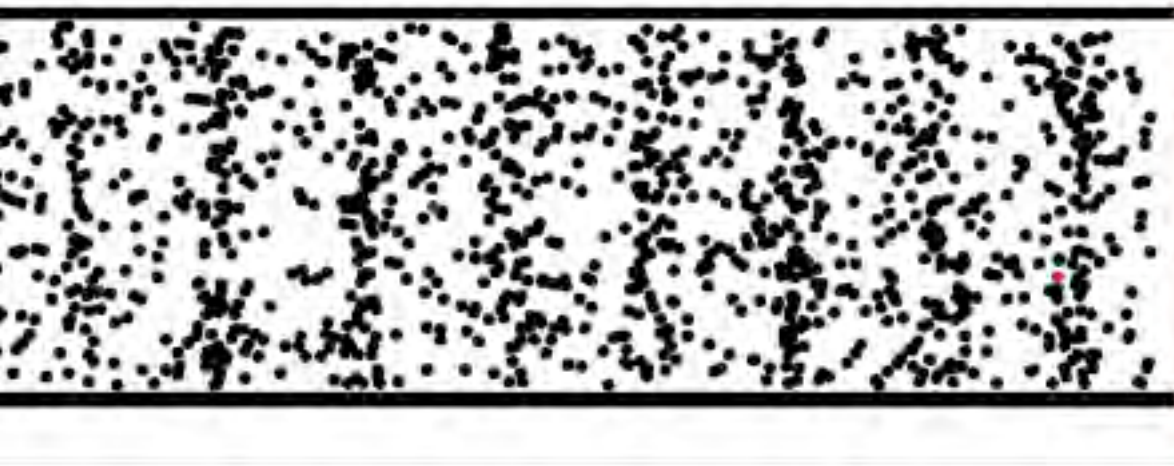

It is only the **LONGITUDINAL** or **COMPRESSIONAL** component of the EMF wave which can impinge of the atom / nucleus to create organized centripetal force.. (gravity)

What Tom Bearden demonstrated about longitudinal emf as the media of gravity waves is also intuitively obvious.

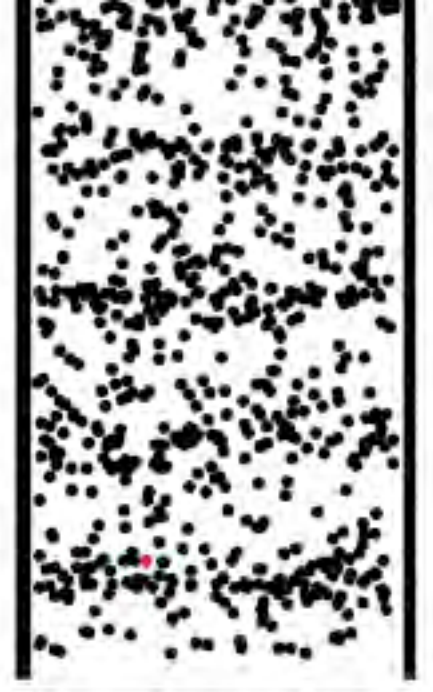

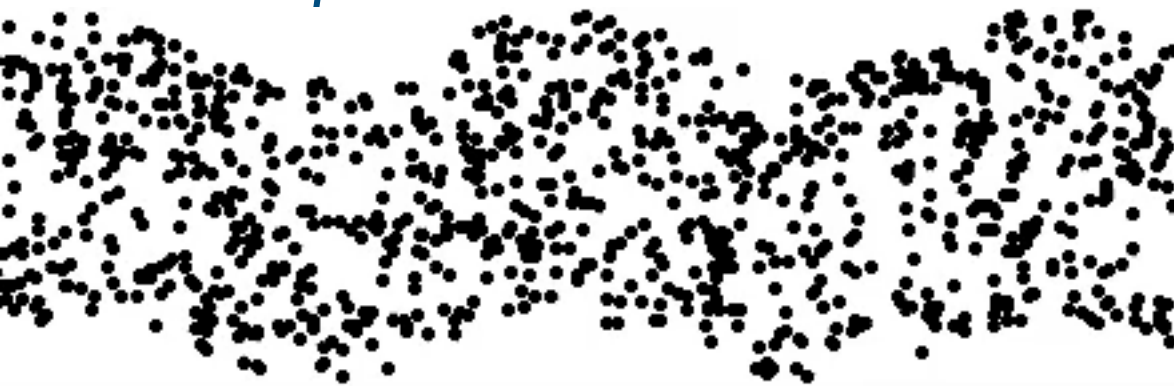

Ondes longitudinales
Interférométrie :
Confinement de plasma.

Seules les *ondes longitudinales peuvent produire une compression implosive, symétrique* (les ondes transversales ne comprimant pas le centre, ne le peuvent donc pas.

L'onde de compression/raréfaction se propage
PARALLÈLEMENT au sens de déplacement.

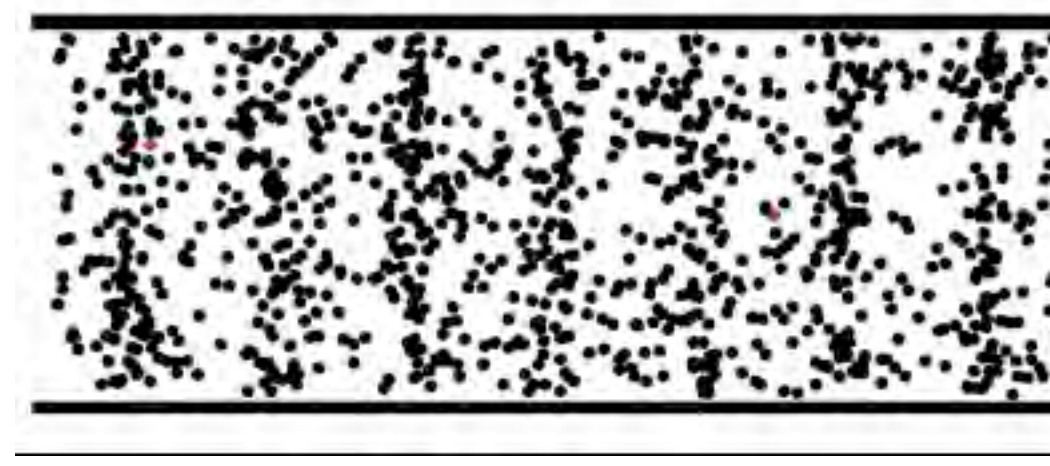

Les ondes électromagnétique transversales vibrent PERPENDICULAIREMENT à la direction de propagation. Lorsqu'elles touchent un atome ou le noyau, il est évident qu'elles ne pourront jamais se compresser/ se comprimer implosivement vers le centre !

est également intuitivement évident.

Phase conjugate fractal compression- causing gravity (and perception) becomes constructive/ implosive/centripetal. The transverse EMF inertia is translated constructively to (superluminal) longitudinal EMF.

The resulting LONGITUDINAL/ COMPRESSIONAL EMF is clearly superluminal/ faster than light: this enables remote action at a distance.

This is a ‘way out’ (* thru lightspeed) for charge during perfect, non-destructive conjugate IMPLOSIVE charge compression. THIS is the mechanism/cause of *gravity, *electro-negativity, *life force, *consciousness, and ALL negentropy.

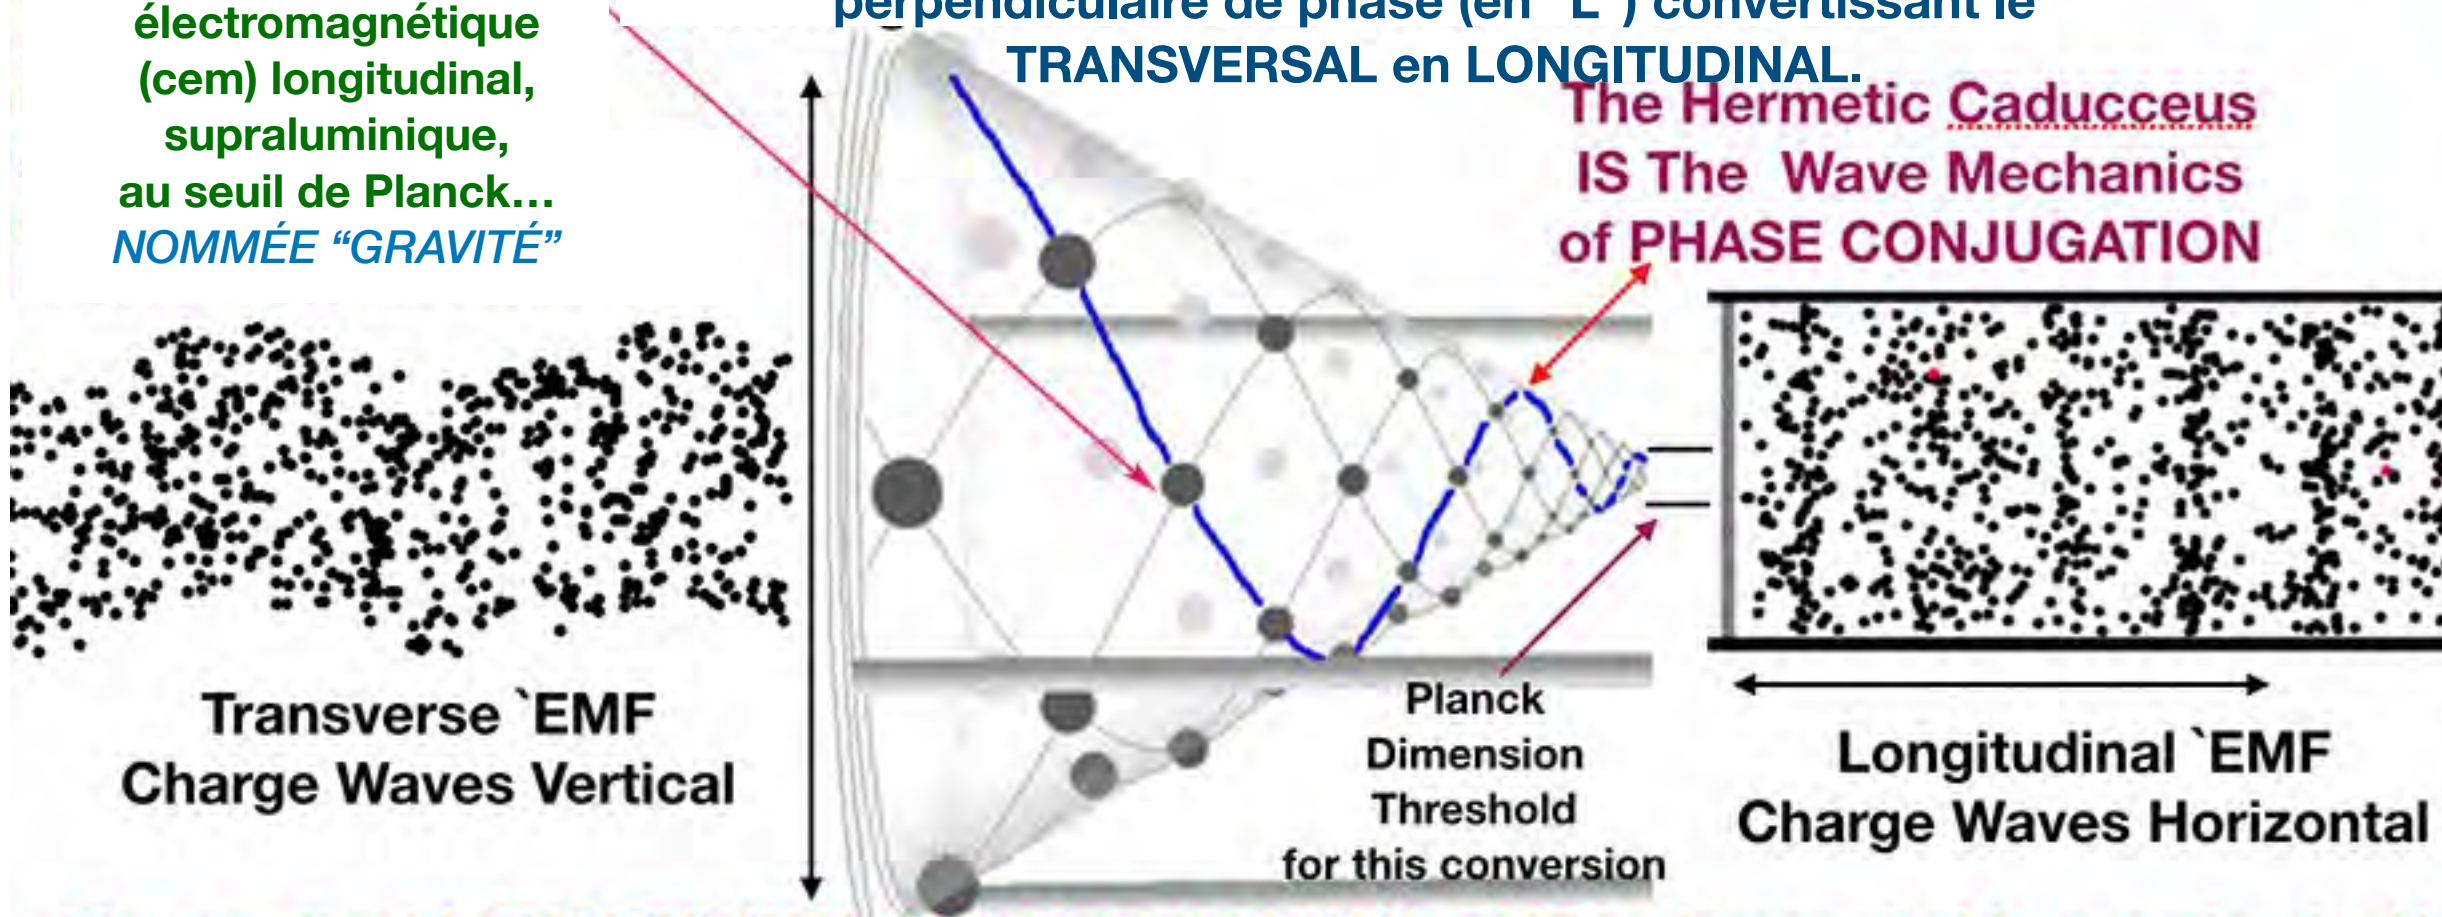

Cette compression fractale, à phase conjuguée, CAUSE de la gravité et la perception, devient constructive/ implosive/ centripète. L'inertie transversale CEM est traduite "constructivement" en CEM longitudinal, *avec des composantes supraluminiques*.

La CONJUGAISON de phase - FRACTALE convertit l'ONDE "TRANSVERSALE" en ONDE DE COMPRESSION, LONGITUDINALE "SCALAIRE" (à vitesses *supraluminiques*)*

La parfaite SPIRALE D'OR (CADUCÉE de profil) effectue, sur le vortex en forme de CÔNE, une parfaite translation de vorticité, un changement perpendiculaire de phase (en "L") convertissant le TRANSVERSAL en LONGITUDINAL.

Le CEM LONGITUDINAL/ DE COMPRESSION, résultant est clairement *supraluminique* (+ rapide que la lumière). Il permet une action à distance. Il s'agit d'une SORTIE pour la charge (* *à travers laquelle la vitesse de la lumière est*) dans sa parfaite compression, conjuguée, *IMPLOSIVE*, non destructive. C'est le mécanisme (ou la cause) de la gravité, l'électronégativité, la force vitale, la conscience, et de TOUTE la néguentropie.

From previous page

* *through light speed*

Strong evidence that this Golden Ratio (fractal, conjugation perfected) is the doorway *through the speed of light*, exists in the famous **Professor Raymond Chiao's** measurements of faster than light velocities- ALL between 1.5 and 1.7 x C /lightspeed -were *centered amazingly around 1.618 - golden ratio*.

This golden ratio fractality then is THE mechanism of charge acceleration, and THAT is the only definition of “THE GRAVITY.”

If Einstein had learned that this is HOW fractal compression turns into acceleration, and becomes infinite (**in-PHI-knit**), non destructive, THEN he might have figured out why “objects fall to the ground”.

Dan Winter

De la page précédente

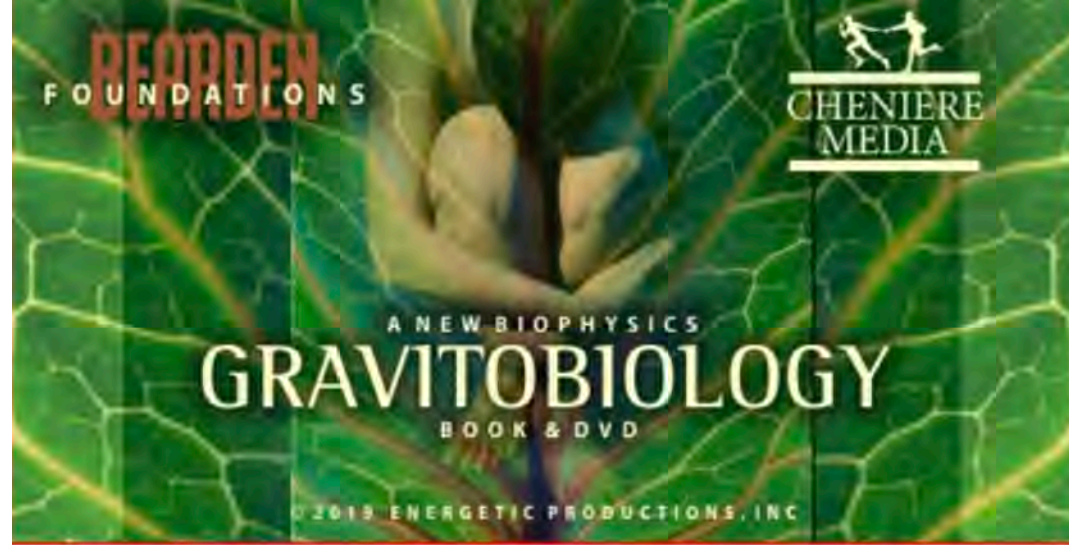

* *traverser la vitesse de la lumière*

La meilleure preuve que ce *ratio d'or* (fractal/ conjugaison perfectionnée) est le passage (nécessaire) pour dépasser la vitesse de la lumière (C), existe dans les mesures du célèbre *professeur Raymond Chiao* de vitesses supérieures - TOUTES comprises entre 1,5 et 1,7 x C -étaient étonnamment centrées autour de 1,618 - le ratio d'or.

Cette fractalité du nombre d'or est donc LE mécanisme d'accélération de la charge, et la SEULE définition de “LA GRAVITÉ”.

Si Einstein avait appris que c'est AINSI que la compression fractale se transforme en accélération, et devient infinie [in-PHI-knit], non destructive, ALORS il aurait peut-être compris pourquoi "les objets tombent par terre”.

HIDDEN ELECTROMAGNETIC MECHANISMS FOR BIOLOGICAL EFFECTS

In 1989 at a keynote lecture at the Whole Life Expo in Los Angeles, California, Tom Bearden introduced the concept of Gravitobiology.

This he explains for an hour and half using slides and his unparalleled knowledge of not only the scientific literature, but also historic and contemporaneous research being carried out in Russia and elsewhere.

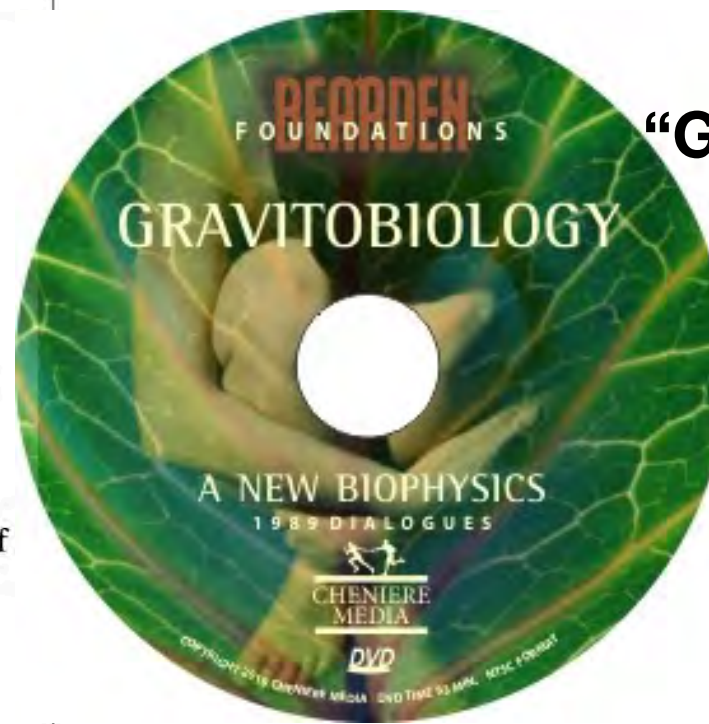

Originally called photobiology, this new field was based on the work of the Russian Gurwich in the 1920s and 1930s who was studying emissions from cells, especially the burst of activity as they were fertilized.

Many other scientists in Russia, working in military institutions, took these experimental findings, developed them further, and weaponized them. Scientists in other countries such as Germany also formulated extensions of these theories based on their additional research findings.

Lisitsyn's work on deciphering the brain's electromagnetic frequencies is also discussed.

But it was Tom Bearden who then took all of their foundational work, melded it together, and then applied quantum mechanics to create the new science of Gravitobiology. The complete science of using all electromagnetic mechanisms to effect biological changes.

This is an exciting journey into territory that is deliberately hidden from public view which will keep you sitting on the edge of your seat as Tom Bearden helps navigate you into this tangled web that is now being

So what charge geometry causes
ATTENTION / Consciousness

.. and Life Itself?

You take the “Planck” dimension-
and keep multiplying by golden ratio.

This causes the charge to implode
- which essentially defines

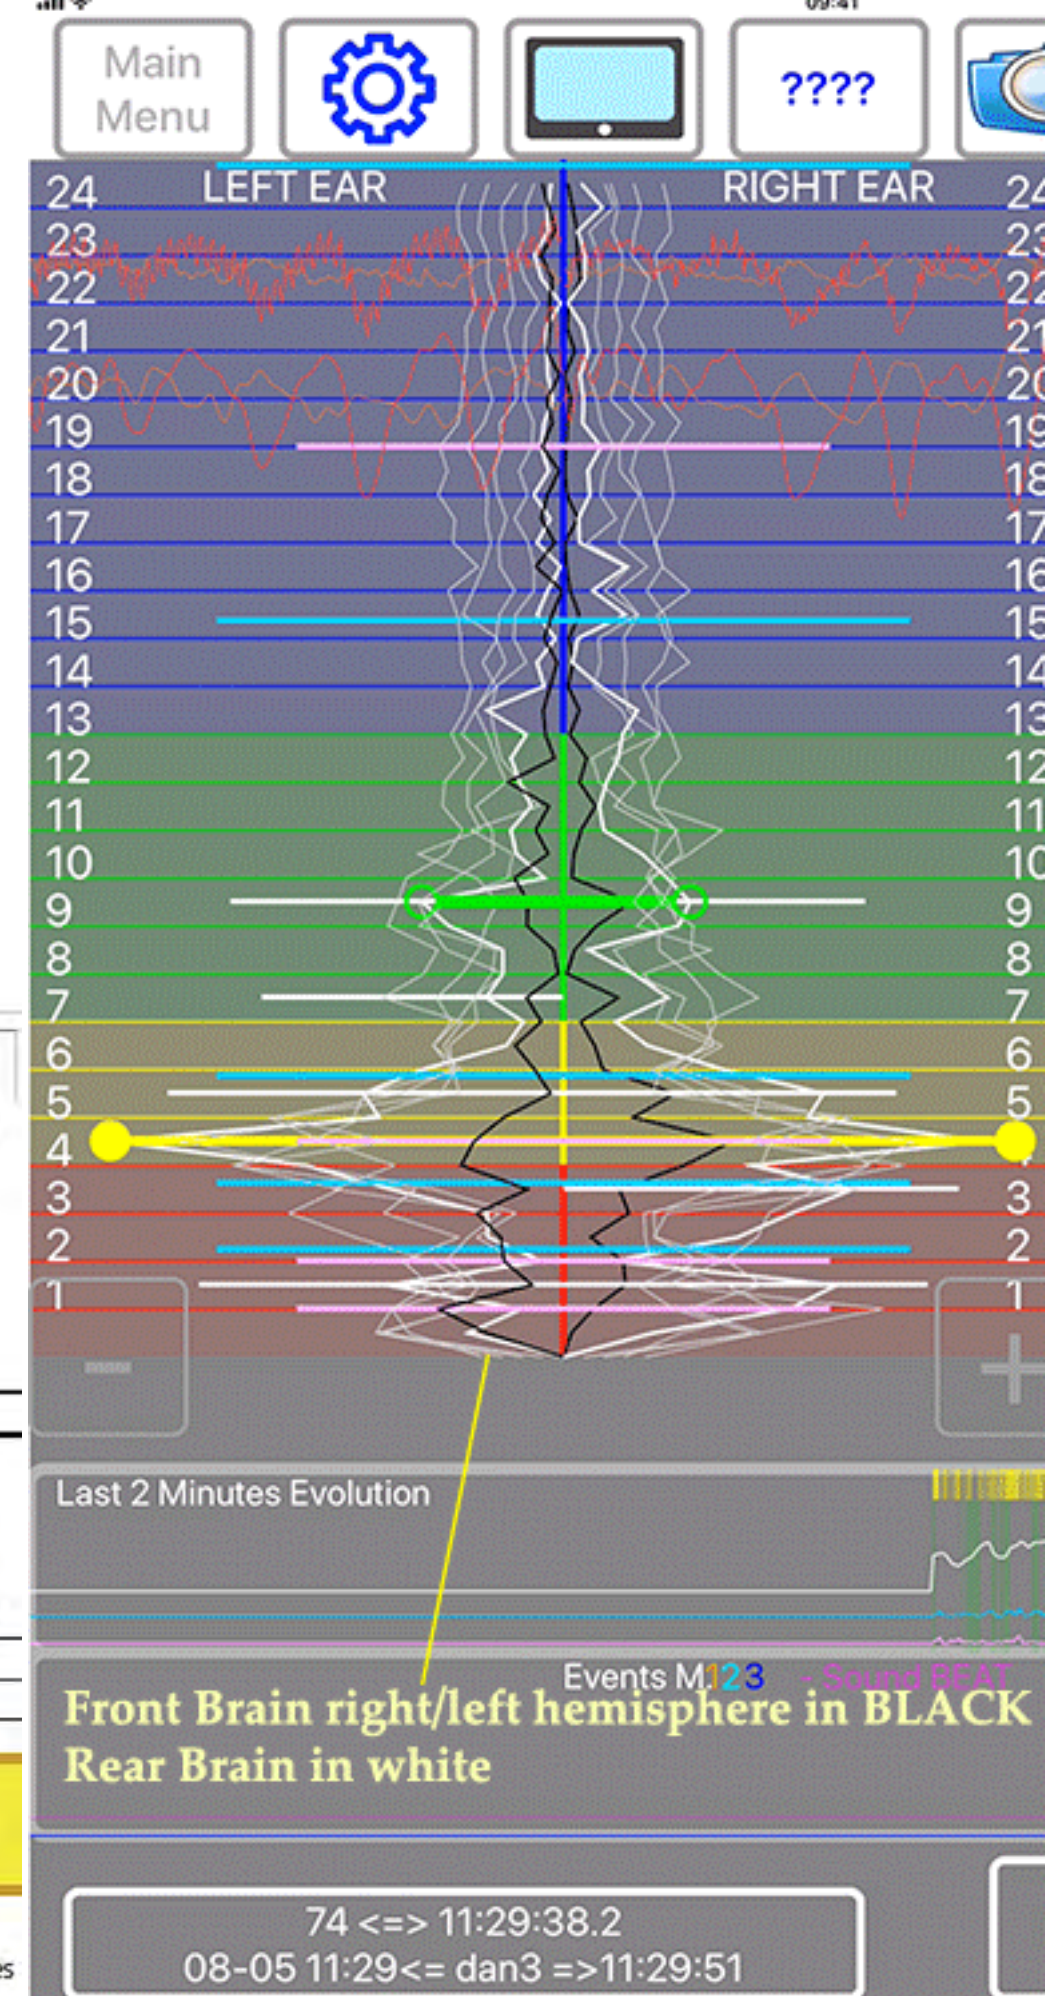

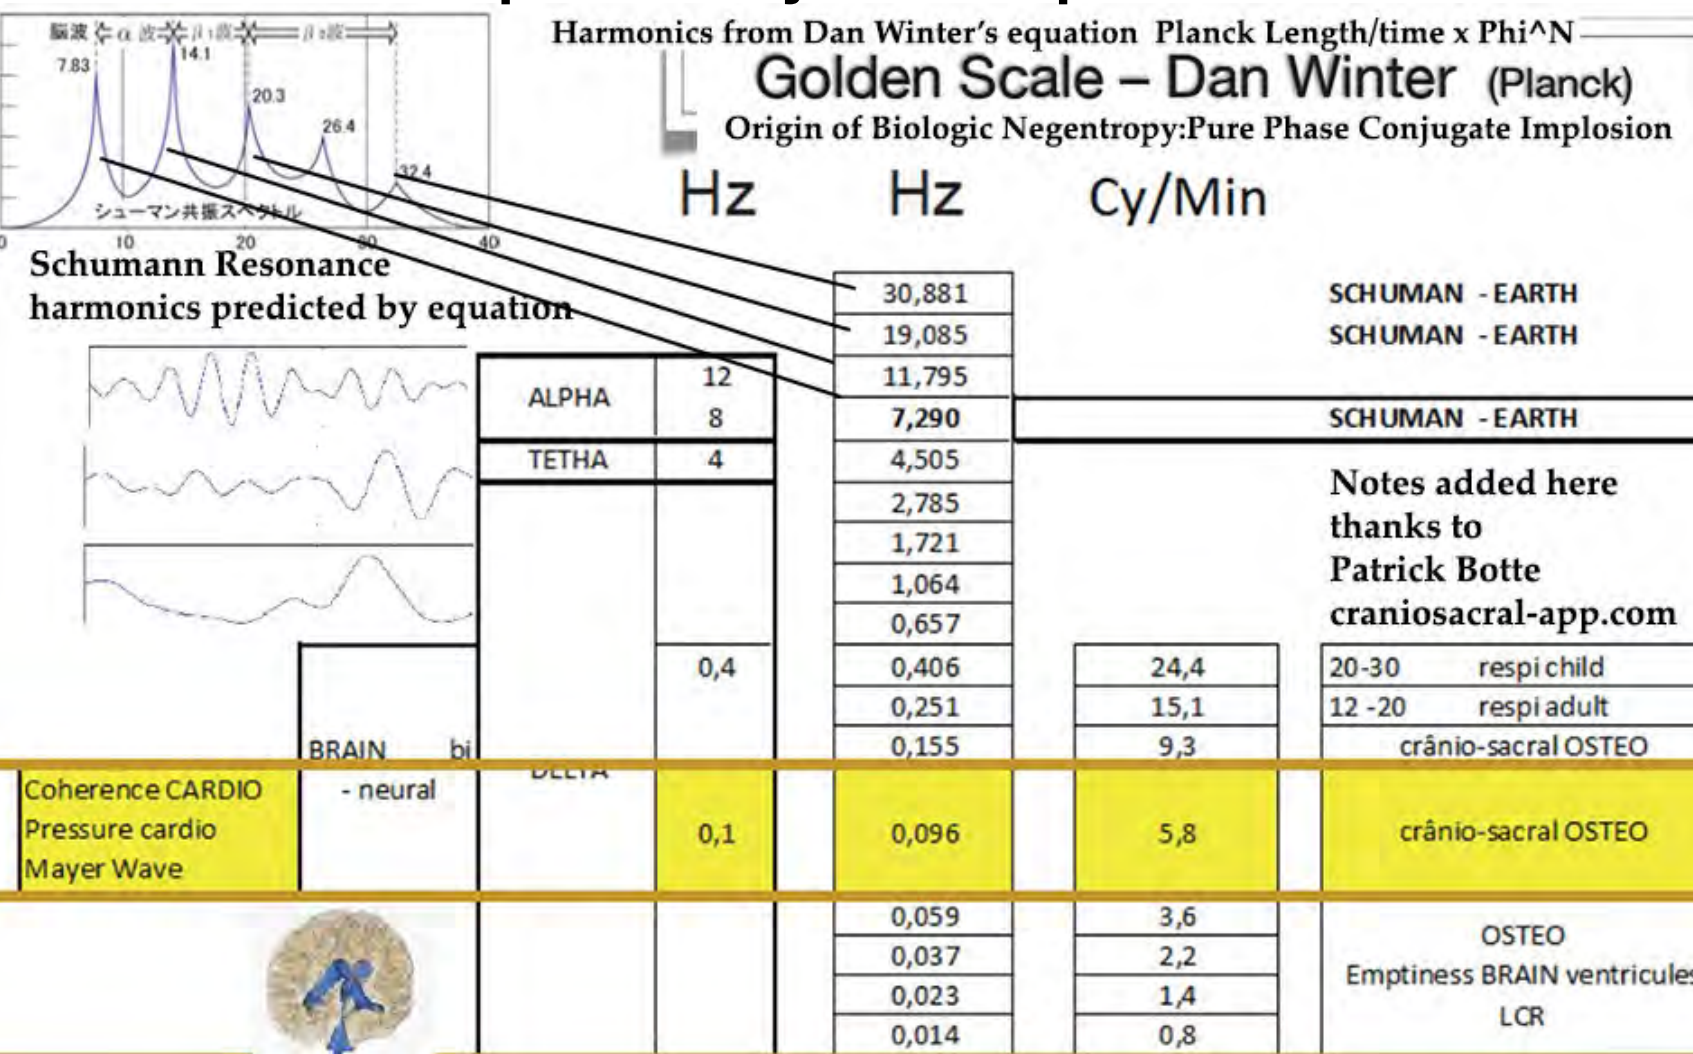

Attention/ Consciousness/ Life & Gravity.

They are all electrically centripetal and negentropic.

Frequency distribution measurements of "inner sounds" reported by 156 meditators were made by asking each meditator to compare the sounds heard during meditation with sounds produced by an audio-frequency oscillator through an earphone in one ear. The subject rotated the oscillator frequency control to match oscillator tones with those heard or remembered as the "inner sound." The frequency distribution is not smooth, but shows several sharp peaks, harmonics of the fundamental frequency, and possibly beat frequencies produced between the third and lateral ventricles of the brain, which are connected by a fluid bridge. In the frequency range below 1 KHz, acoustical standing waves running through the entire body appear, as do the higher harmonics of the heartbeat and the heart sounds.

About the deep interconnectedness of all things,
where even your feelings have a direct influence on the environment,
which becomes visible on a computerscreen by the new invention of
Dan Winter, the Hearttuner.

La compassion se développe
quand la petite image à l'intérieur de
son cœur devient si
“*auto-similaire*” (ou “*fractale*”)
au magnétisme d'une autre personne-
que la parfaite compression -
de cet “*attracteur fractal*”-
aspire l'extérieur- à l'intérieur !
Ce mouvement RÉCURSIF -
de l'INTÉRIEUR vers
l'EXTÉRIEUR-
devient l'IMPLOSION, la décharge
électrique, associée au SENTIMENT
DE COMPASSION, et
manifeste par l'ASCENSION
des harmoniques suivantes,
mesurables par l'ECG.

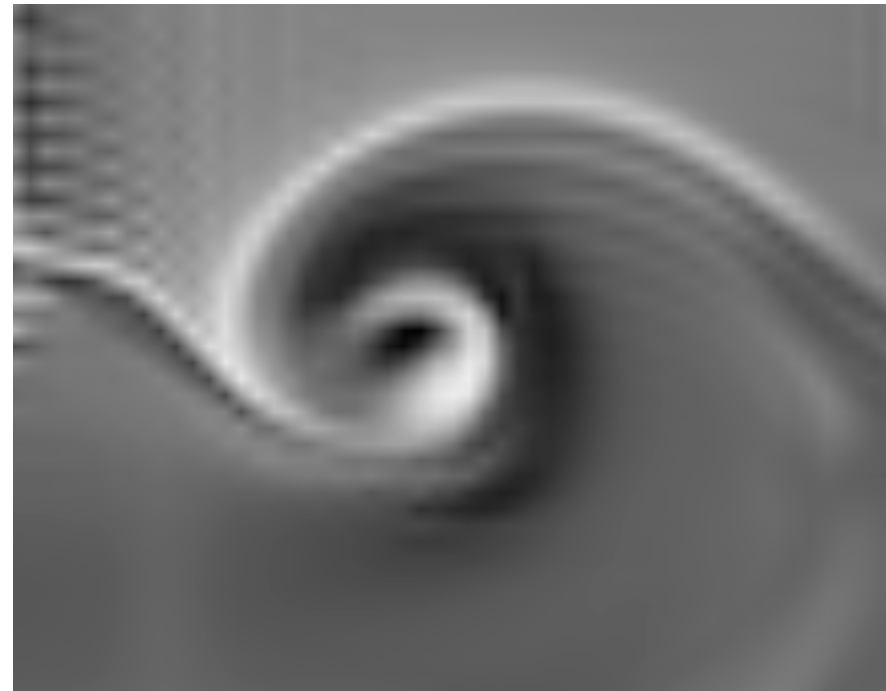

LA COMPASSION équivaut à «L'ASCENSION »
par COMPRESSION ?

L'IMPLOSION existe car dans la géométrie de l'AUTO-SIMILARITÉ, il est possible pour une ONDE de ré-entrer sur ELLE-MÊME - non destructivement. La capacité de s'auto-RÉFÉRER - Définition védique de la CONSCIENCE.

Implosion Exists Because In The Geometry of "SELF SIMILARITY" - It is Possible for a Wave to Re-Enter ITSELF - Non-Destructively. Ability to SELF-REFER is the Vedic definition of CONSCIOUSNESS.

**LA SPIRALE D'OR,
en mécanique ondulatoire est
*L'AUTO-SIMILARITÉ, LA RÉ-ENTRÉE
DES ONDES SUR ELLES-MÊMES,
ET LA CONSCIENCE DE SOI*

**The GOLDEN MEAN SPIRAL Is Self-Similarity,
wave self-ReEntry, And Self-Awareness Perfected

Plus tard, nous utiliserons l'analyse
spectrale pour mesurer ce phénomène.
*Later we use Spectrum Analysis to Measure
This*

En hydrodynamique, cela s'appelle la "*traduction optimisée de la vorticité*" : c'est-à-dire c'est la seule façon pour l'inertie d'une ligne d'être "traduite" en cercle". L'inertie créée par des ondes en rotation est la SEULE définition de la MASSE, cette traduction est par définition la trajectoire parfaite de la MASSE vers l'ÉNERGIE.

In Hydrodynamics- This is called: "Optimized Translation of Vorticity" It means - this is the only way for Inertia in a line to be "translated into a circle". Since the inertia created by waves in rotation is the ONLY definition for MASS - this translation is by definition the perfect path from MASS to ENERGY.

The Solution to the (naturally centripetal) WAVE NATURE OF MIND and CONSCIOUSNESS

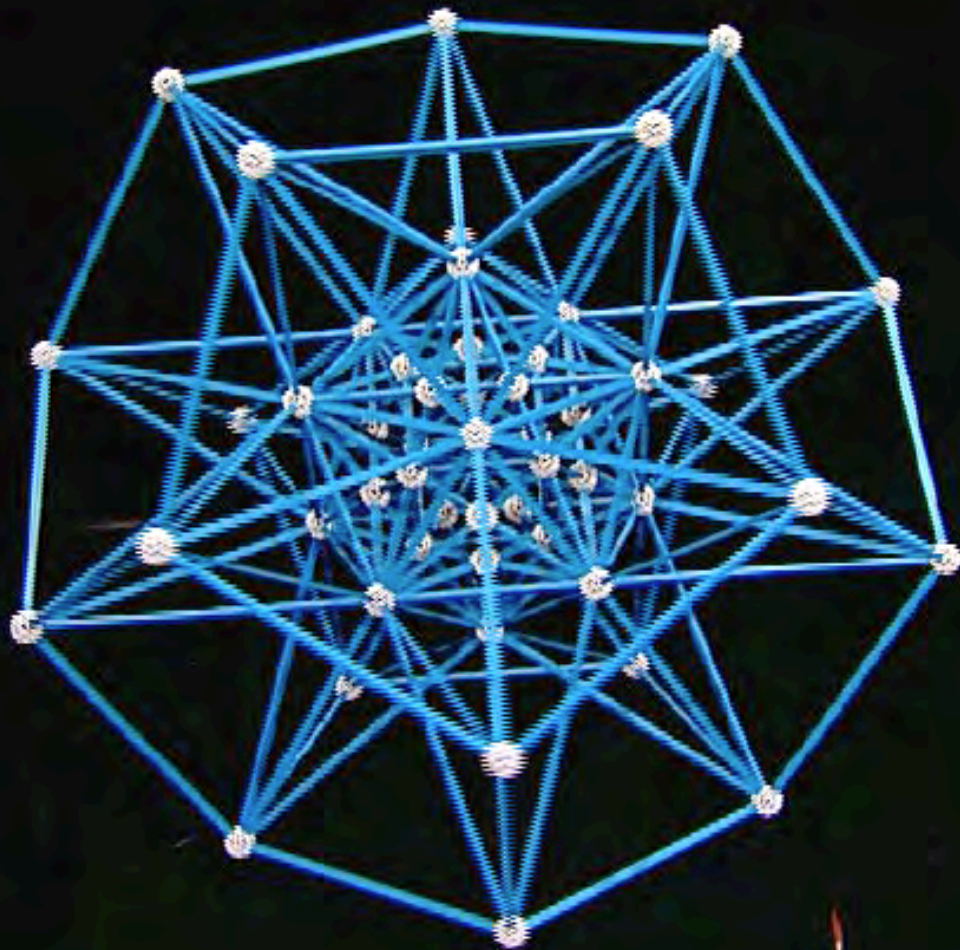

is also the (Implosive) Solution
to Zero Point Energy and Fusion

- The “Perfect Flame”
is a “fire that does not consume”
- Perfect (Implosive) Compression..
generates NO heat (non-destructive)
- Phase Conjugate (Dielectrics / Optics / Magnetics) -

- Perfect FUSION - is this ‘self organizing’
/ naturally ‘centripetal’ - plasma containment.

Fire your childs physics teacher now: if they are too arrogant to learn why objects fall to the ground.. and therefore what (centripetal force) holds the atomic table together!
If they are that stupid it probably means they are ALSO teaching your kids the suicidal idea that the universe is CONDEMNED to ENTROPY.. instead of correctly teaching the SAME FRACTAL CHARGE COLLAPSE WHICH CAUSES GRAVITY, CONSCIOUSNESS AND LIFE FORCE ALSO CAUSES NEGENTROPY!

Niels Bohr did not learn the principle which holds electron shells together : centripetal force CAUSED by charge collapse This is WHY electron shells AND nuclear shells are ONLY a simple platonic solid nest - www.goldenmean.info/creation - BECAUSE that is THE way to create compression/ creation in 3D using golden ratio fractal centripetal (gravity making) charge collapse : THE NO1 rated Unified field physics: www.fractalGUT.com

Dan Winter challenges physics to 1. quantify this obvious SELF SIMILARITY between electrons charge symmetry vs. nucleus charge symmetry,

and 2. show that in fact there can be ANY other reason for this SELF SIMILARITY (between electron shells vs nucleus) if not to CAUSE the gravity which holds (constructive charge collapse= charge implosion >where charge compression becomes the charge acceleration which DEFINES gravity?)

Here is proof that Dan Winter located, identified and mathematically proved the fractal structure of hydrogen

Only the Golden Spiral charge compression trajectory allows the phase VELOCITIES to interfere / heterodyne recursively constructively.... THEREFORE Only this geometry turns charge compression toward center.. in to charge ACCELERATION toward center.. named THE GRAVITY.

microwave propulsion

(above) *The famous 'EM' drive (electro-gravitic propulsion) makes gravity because the microwave trapezoid conjugates/ implodes the frequency cascade at the focal point. At this wave conjugation point, the compression produces directional, longitudinal emf (which is gravity). It needs to be tuned- accurately by my Golden ratio x planck equation to optimize.*

(ci-dessus) Le fameux moteur EM (*propulsion électro-gravitique*) produit de la gravité parce que le trapèze à micro-ondes *conjugue* et *implose* la cascade de fréquences au point focal. À ce point *de conjugaison des ondes*, la compression produit un champ électromagnétique (CEM) directionnel et longitudinal (qui est la gravité). Le moteur EM (*électro-gravitique*) doit être réglé - avec précision par mon équation du ratio d'or x Planck, afin de l'optimiser.

Historic source: Crystal Drive (Kowsky-Frost/Gallimore)

This project relates to an experiment that was originally done in 1927, in a Poland lab. It involved the piezo/electromagnetic overloading of a quartz crystal, and the subsequent increase of volume and changes on a molecular and quantum level. The original experiment indicated that the lift to weight ratio was approximately 800:1, with a 90 watts per pound, or 198.45 watts per kg, power expenditure. Subsequent analysis of the data indicated that the power expenditure was related to input frequency, with the two being inversely proportional to one another.

The original experiment was performed using 2000 watts at 770 KHz, essentially an AM radio transmitter beamed into the crystal. The crystal was first conditioned by placing it in a chamber with an asymmetric pump wave that expanded and reformed

Sci Fi: Niobium warp crystal

Physics: Lithium Niobate phase conjugate dielectric

The original experiment was performed using 2000 watts at 770 KHz, essentially an AM radio transmitter beamed into the crystal. The crystal was first conditioned by placing it in a chamber with an asymmetric pump wave that expanded and reformed the crystal lattice, evidently forming a new one at a higher quantum state. The crystal lost its transparency, going from clear to opaque white while increasing its size to 20 times its former length on each side, with a volumetric increase of a factor of 4000:1. It was after this volumetric increase that the crystal was subjected to pumping by electromagnetic means to generate the lift.

A research associate, who will remain unnamed for security reasons, recreated this first stage of the experiment to expand the crystal, and noted that it radiated a field that felt tangible for a radius of 2 meters around the device. It had the aspects of an electrostatic field, but did not show up on a surface electrometer or a remote EMF field meter. According to him, there was a weight discrepancy between inside and outside the field, possibly due to an unknown electrogravitic effect.

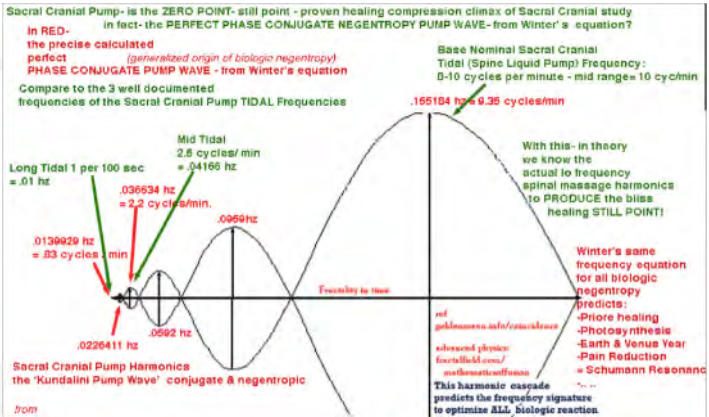

(MARCEL VOGEL) QUARTZ CRYSTAL HEALING: the crystal is pure HEX symmetry- so the piezo field generated will NEVER be conjugate or implosive- or centripetal- to output the critical Longitudinal/healing compressional EMF - UNLESS - it is driven by an EXTERNAL phase conjugate pump (pressure) wave in this case that MUST come from the BODY (feeling Bliss!) who HOLDS IT

What does **WARP** propulsion mean (*Star-Trek, ex: Kowsky Frost*)?

The classic image conventional physics uses to describe wormhole is misleading- they say 'entanglement' creates Einstein-Rosenbridge'/wormhole...

In fact golden ratio phase conjugation (perfect nesting) IS the perfection of entanglement... The resulting coherent longitudinal emf plasma projection -includes golden ratio superluminal cascades-

(The 'fractal attractor') creating 'action at a distance' down the vortex...

Time space is NOT 'warped' or bent, it is a gradient of acceleration (DW) - the charge paths are connected faster than light DUE to conjugate implosion. That fractal phase conjugate implosion also meaningfully describes the cause of gravity- AND connects the longitudinal ARRAY - mechanism of path thru lightspeed.. (how wormholes work).

Describing space-time as somehow 'bent' is not specific

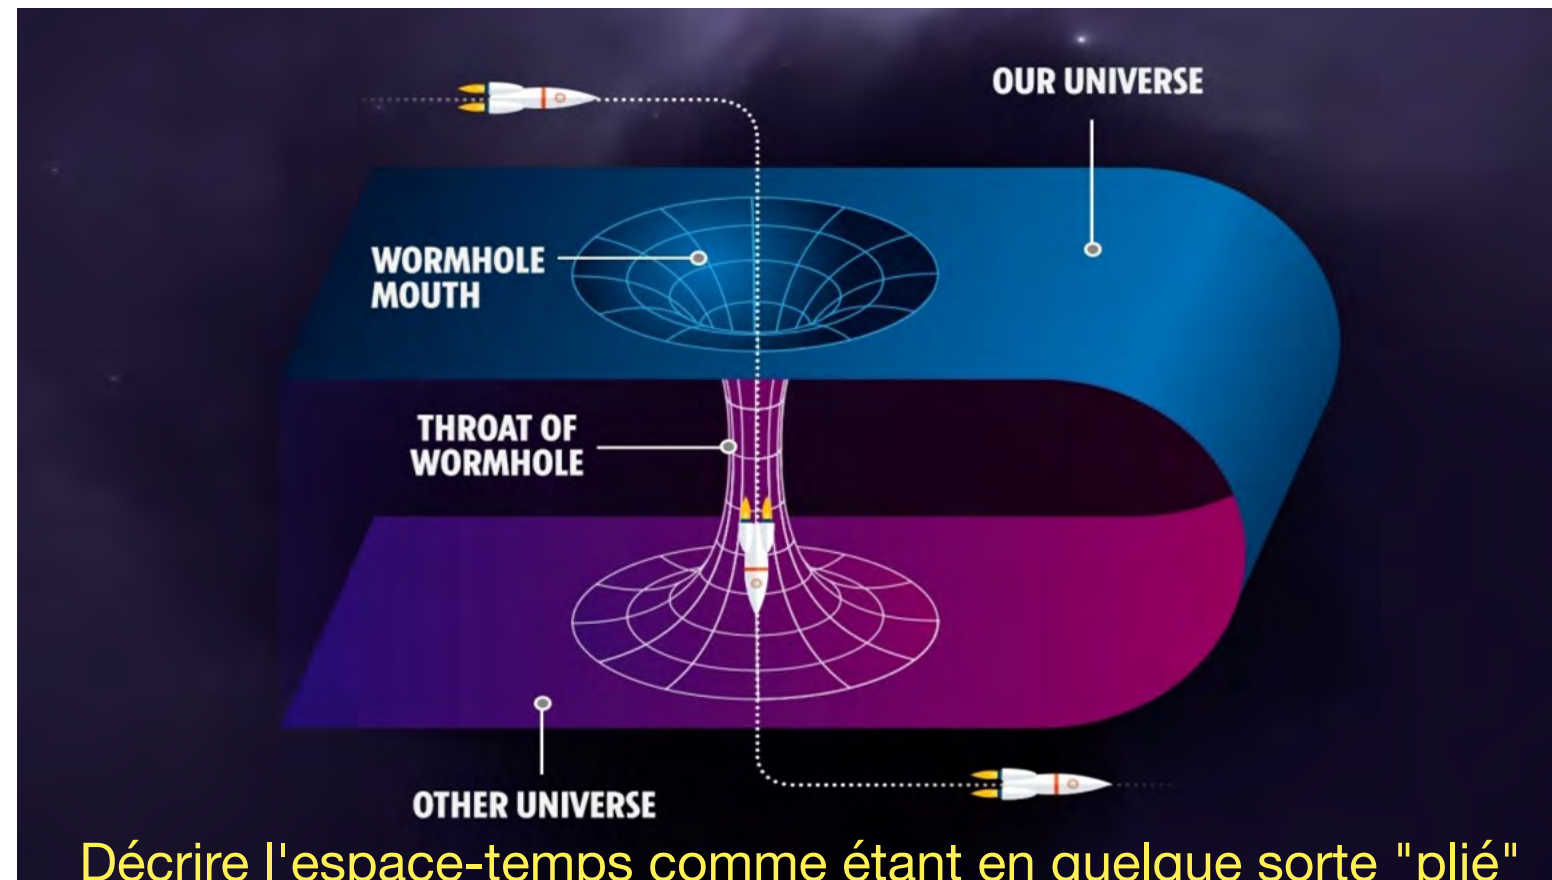

Dan Winter - fractalfield.com

It is the lines of charge compression which implode and thus fractally attract.. causing the acceleration of charge toward symmetry center.. named.. 'the gravity'

The seeming 'action at a distance' of black holes/stargates/portals - is the result of golden ratio fractal - multiples of light speed (ref Chiao) nested- due to conjugate created coherent longitudinal emf interferometry.. (which Bearden proved is the stuff of gravity waves)

Que signifie la propulsion **WARP** (Star-Trek, ex : Kowsky Frost) ? L'image classique utilisée par la physique conventionnelle pour décrire les vortex est trompeuse, elle dit que l'*intrication*/ l'*enchevêtrement* crée le trou de ver d'Einstein-Rosenbridge...

En fait, la conjugaison de phase au ratio d'or (*nidification* parfaite) EST la perfection de l'*enchevêtrement*... La projection cohérente de plasma *cem* longitudinal qui en résulte comprend des cascades supraluminiques au ratio d'or - (L' "*attracteur fractal*") créant une "action à distance" à travers le vortex... *L'espace-temps n'est PAS (warped) plié, il s'agit d'un gradient d'accélération (DW)*. Les chemins de charge sont connectés plus vite que la lumière EN RAISON de l'implosion conjuguée. Cette implosion fractale à phase conjuguée décrit également de manière significative la cause de la gravité - ET connecte au réseau (ARRAY) longitudinal - mécanisme de dépassement de la vitesse de la lumière (fonction des trous de ver).

Décrire l'espace-temps comme étant en quelque sorte "plié" n'est pas assez précis...

Dan Winter - fractalfield.com

Ce sont les lignes de compression de charge qui implosent et donc s'attirent fractalement... causant l'accélération de la charge vers le centre de symétrie... nommé... "**La Gravité**"

L'apparente "action à distance" des trous noirs/ portes stellaires / portails - est le résultat (de la fractalité/ *gigognes*) du ratio d'or x par la vitesse de la lumière (réf. Chiao) en raison de l'interférométrie des champs EM longitudinaux cohérents créés de manière conjuguée (dont Bearden a prouvé qu'ils étaient à l'origine des ondes gravitationnelles).

**In terms of saving the planet- remember that learning this lesson of IMPLOSIVE CHARGE COLLAPSE
NEGENTROPY, cause of Gravity/ Electro Gravitic Propulsion- is at once PRECISELY the VACUUM
ENERGY Physics PRINCIPLE - of ALL Zero Point/ Vacuum (“Free”) Energy devices...**
**[*fractalfield.com/vacuumenergy*](http://fractalfield.com/vacuumenergy) , For example did you know that any capacitor with a high enough
dielectric constant- is BY DEFINITION a ZERO POINT/ Free Energy (Implosion) Device?!**

Dan Winter : “ Si vous saviez COMMENT **le plasma** devient conscient (**Effondrement implosif des ondes**) - ALORS vous sauriez :

+ ce que fait l'esprit (ghost) après la mort

+ comment diriger une tornade (goldenmean.info/dowsing)

+ comment guérir avec le plasma (theraphi.net)

+ l'origine des anges ! (goldenmean.info/ophanim)

+ comment un vortex peut guérir l'eau (theimploder.com)

+ où aller, ou ne pas d'aller dans un rêve lucide (éviter les boîtes en acier/ aluminium)

+ pourquoi la boule de foudre répond généralement à la télépathie

+ comment le vortex de plasma dans votre cerveau voit sans les yeux - ET crée la félicité !

+ comment l'INTENTION naît des (grands vortex) trous noirs/ trous de ver (réf : *The Nine*)

+ origines physiques des concepts de Dieu, Ciel (Heaven)....

+ de quoi sont faits les 'orbes'/ les esprits de la nature/ les élémentaux ?

+ comment l'ALCHIMIE de la transition isotopique (LENR)/ transmutation/ effondrement de la charge DEVIENT l'alchimie de l'ÂME (communion dense de spin)

+ pourquoi le point d'implosion/ fractal/ conjugué est central (de gravité) de toute pleine conscience ”

En terme de sauvetage de la planète, rappelez-vous que l'apprentissage de cette leçon **D'EFFONDREMENT IMPLOSIF/NÉGUENTROPIQUE DE LA CHARGE**, cause de la gravité et de la propulsion électro-gravitique, est en même temps **PRÉCISEMENT** le principe physique de l'ÉNERGIE **DU VIDE** de TOUS les appareils à énergie libre. fractalfield.com/vacuumenergy

Par exemple, saviez-vous que tout condensateur, ayant une constante diélectrique suffisamment élevée, est **PAR DÉFINITION** un dispositif d'énergie libre (d'implosion) à point zéro !

understanding PHASE CONJUGATE MAGNETICS- invented by Dan Winter. Study the chart of the magnetic frequencies which Elizabeth Rauscher found (in early FDA trials) - ELIMINATED PAIN (and anecdotally- accelerated healing):

- Harmonics of Magnetic Field- Which Imitate and Create Pain Reduction (Measured) and Healing (Not Confirmed)..
 - Harmonics of Healing were measured then imitated
- Critical Frequency Cascade Appears to be Phase Conjugate

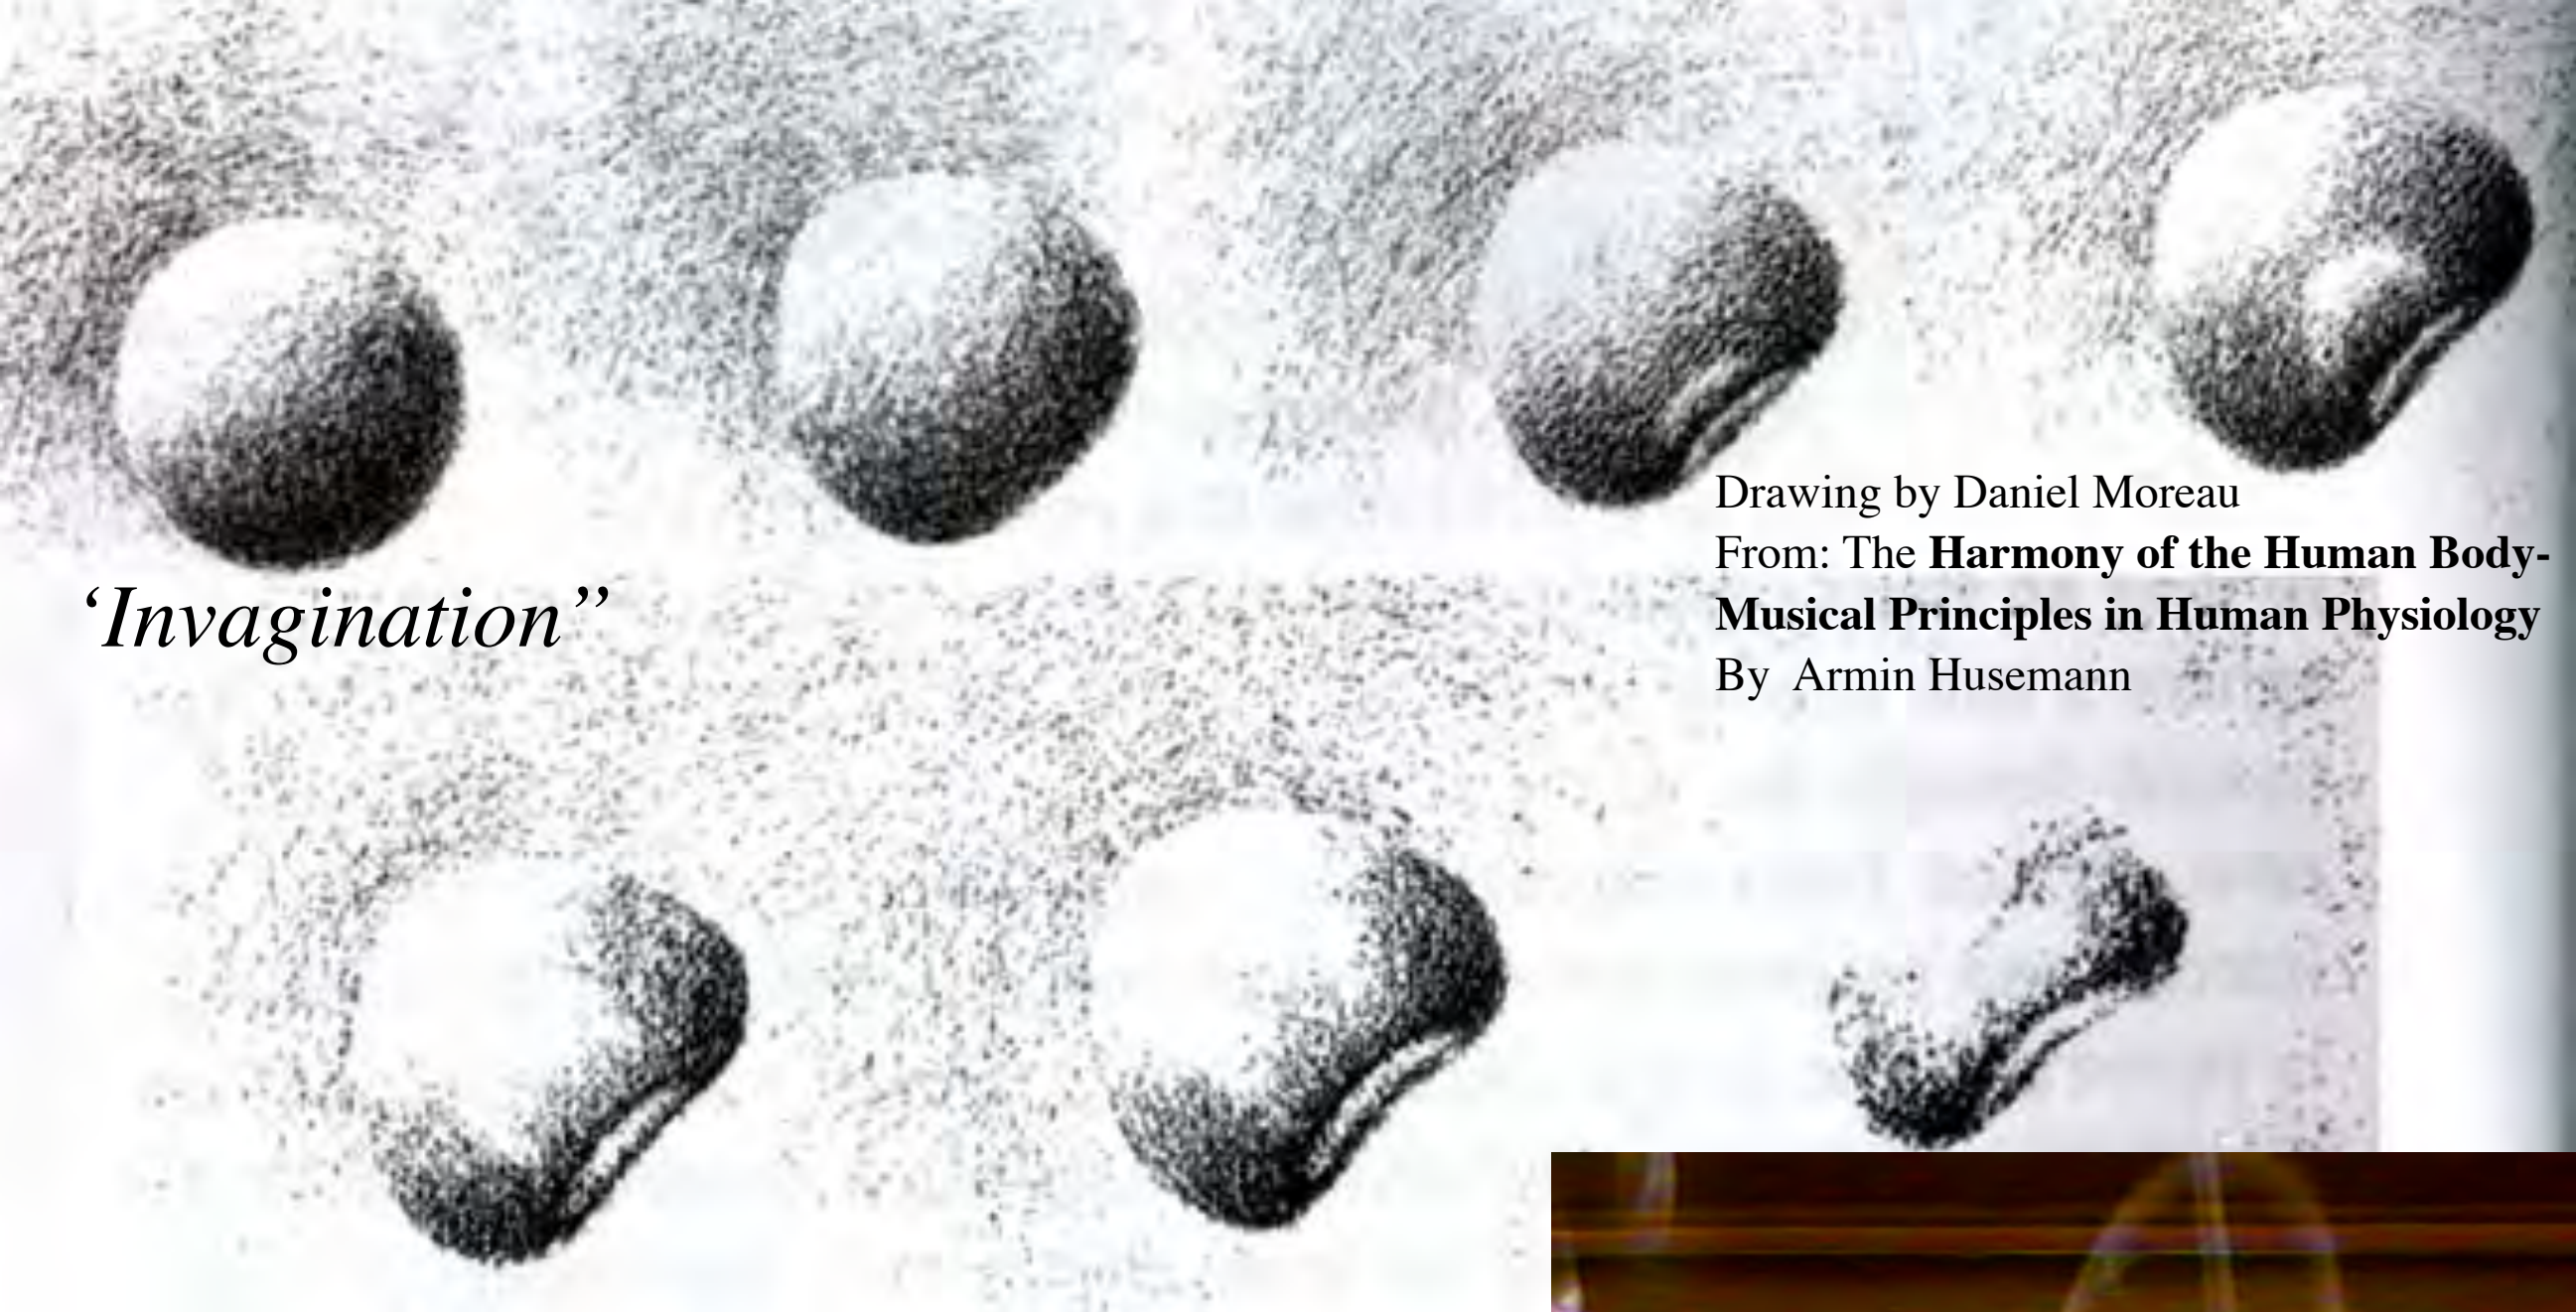

Winter has applied precise phase conjugate / caduceus scaling geometry - planck time to golden ratio - to show WHY these frequencies end pain/heal

What Dr.Rauscher later realized was this is an example of Dan Winter's concept of PHASE CONJUGATE MAGNETICS. Later Winter- has shown that you can take the KEY FREQUENCIES in this graph and DERIVE THEM- from his original equation for the geometry of hydrogen (radius AND frequency): proof of the fractal nature of gravity. (goldenmean.info/goldenproof , goldenmean.info/coincidence). This much deeper physics now provides the backdrop- as Winter has used ONLY AND PRECISELY THESE FREQUENCIES and geometry IN EVERY INVENTION HERE. (Pyraphi and Imploder are built exclusively with this precise golden ratio TO hydrogen and planck scaling factor - the ultimate global scaling solution! - goldenmean.info/globalscaling).

We are of course pleased to acknowledge and support dear Dr Elizabeth Rauscher- but now that we know how to complete the harmonic cascade by definition from a deeper physics (phase conjugation to Planck) - we will carry this work to completely new level.

What this means is we now know precisely the magnetic (and by analog-dielectric) FIELD which restores compression and is the FIELD SYMMETRY KEY to healing and tissue regeneration in general. Winter and his team (thanks to Andrew!) are deeply

Bioelectrographic correlates of the Altered States of Consciousness

1. Extensive and steady fractal fluctuations $1/f$ in the spectrum of EEG with SD attractors = $1.618 \pm 10\%$ (Golden Ratio);
2. Disappearance of the bilateral (between hemispheres) and frontal-occipital brain asymmetry:
at the level of cortical activation;
at the level of quazi-DC potential;
3. Harmonization of the cortical pattern of activation: between Cz & another regions with minimum of activation in temporal regions;
4. Increase of the intensity of the GDV energy-emission processes in frequency range of 215-650 nm;
5. Increment of fractality of the patterns of GDV aura and appearance of the distant emission patterns;
6. High inclination angle of the dynamical GDV curves.

Dr.Ed Wilson, then research director: Monroe Institute- independantly discovers that Fibonacci (to Golden Ratio) Audio Tone Headphone cascades trigger TRANSCENDENCE in Brainwave mapping. He redefines transcendence for Brainwave study. Dr.Wilson discovers Dan Winter's similar work linking Golden Ratio in EKG cascades to Compassion- travels to NY and creates documentary with Winter (1992).

2 1990's: MindMirror biofeedback systems (book: "Awakened Brain" by Cade) consistently shows the particular cascade of brainwaves harmonics in symmetry produces "CREATIVE INSPIRATION, PERSONAL INSIGHT, & SPIRITUAL AWARENESS". MindMirror groups fail to notice that the KEY RATIO in EEG which triggers this CREATIVITY phenomenon is GOLDEN MEAN in brainwaves- the PRINCIPLE OF NON-Destructive Compression.

Mind Mirror (3 times the cost of HeartTuner with less than 1/3 the features).. correctly describes this brainwave picture- but misses **the PURE PRINCIPLE (Golden Mean / Implosion- RATIO in the cascade symmetry) triggers BLISS & Learning.** Their database describes this Brainwave harmonics picture:

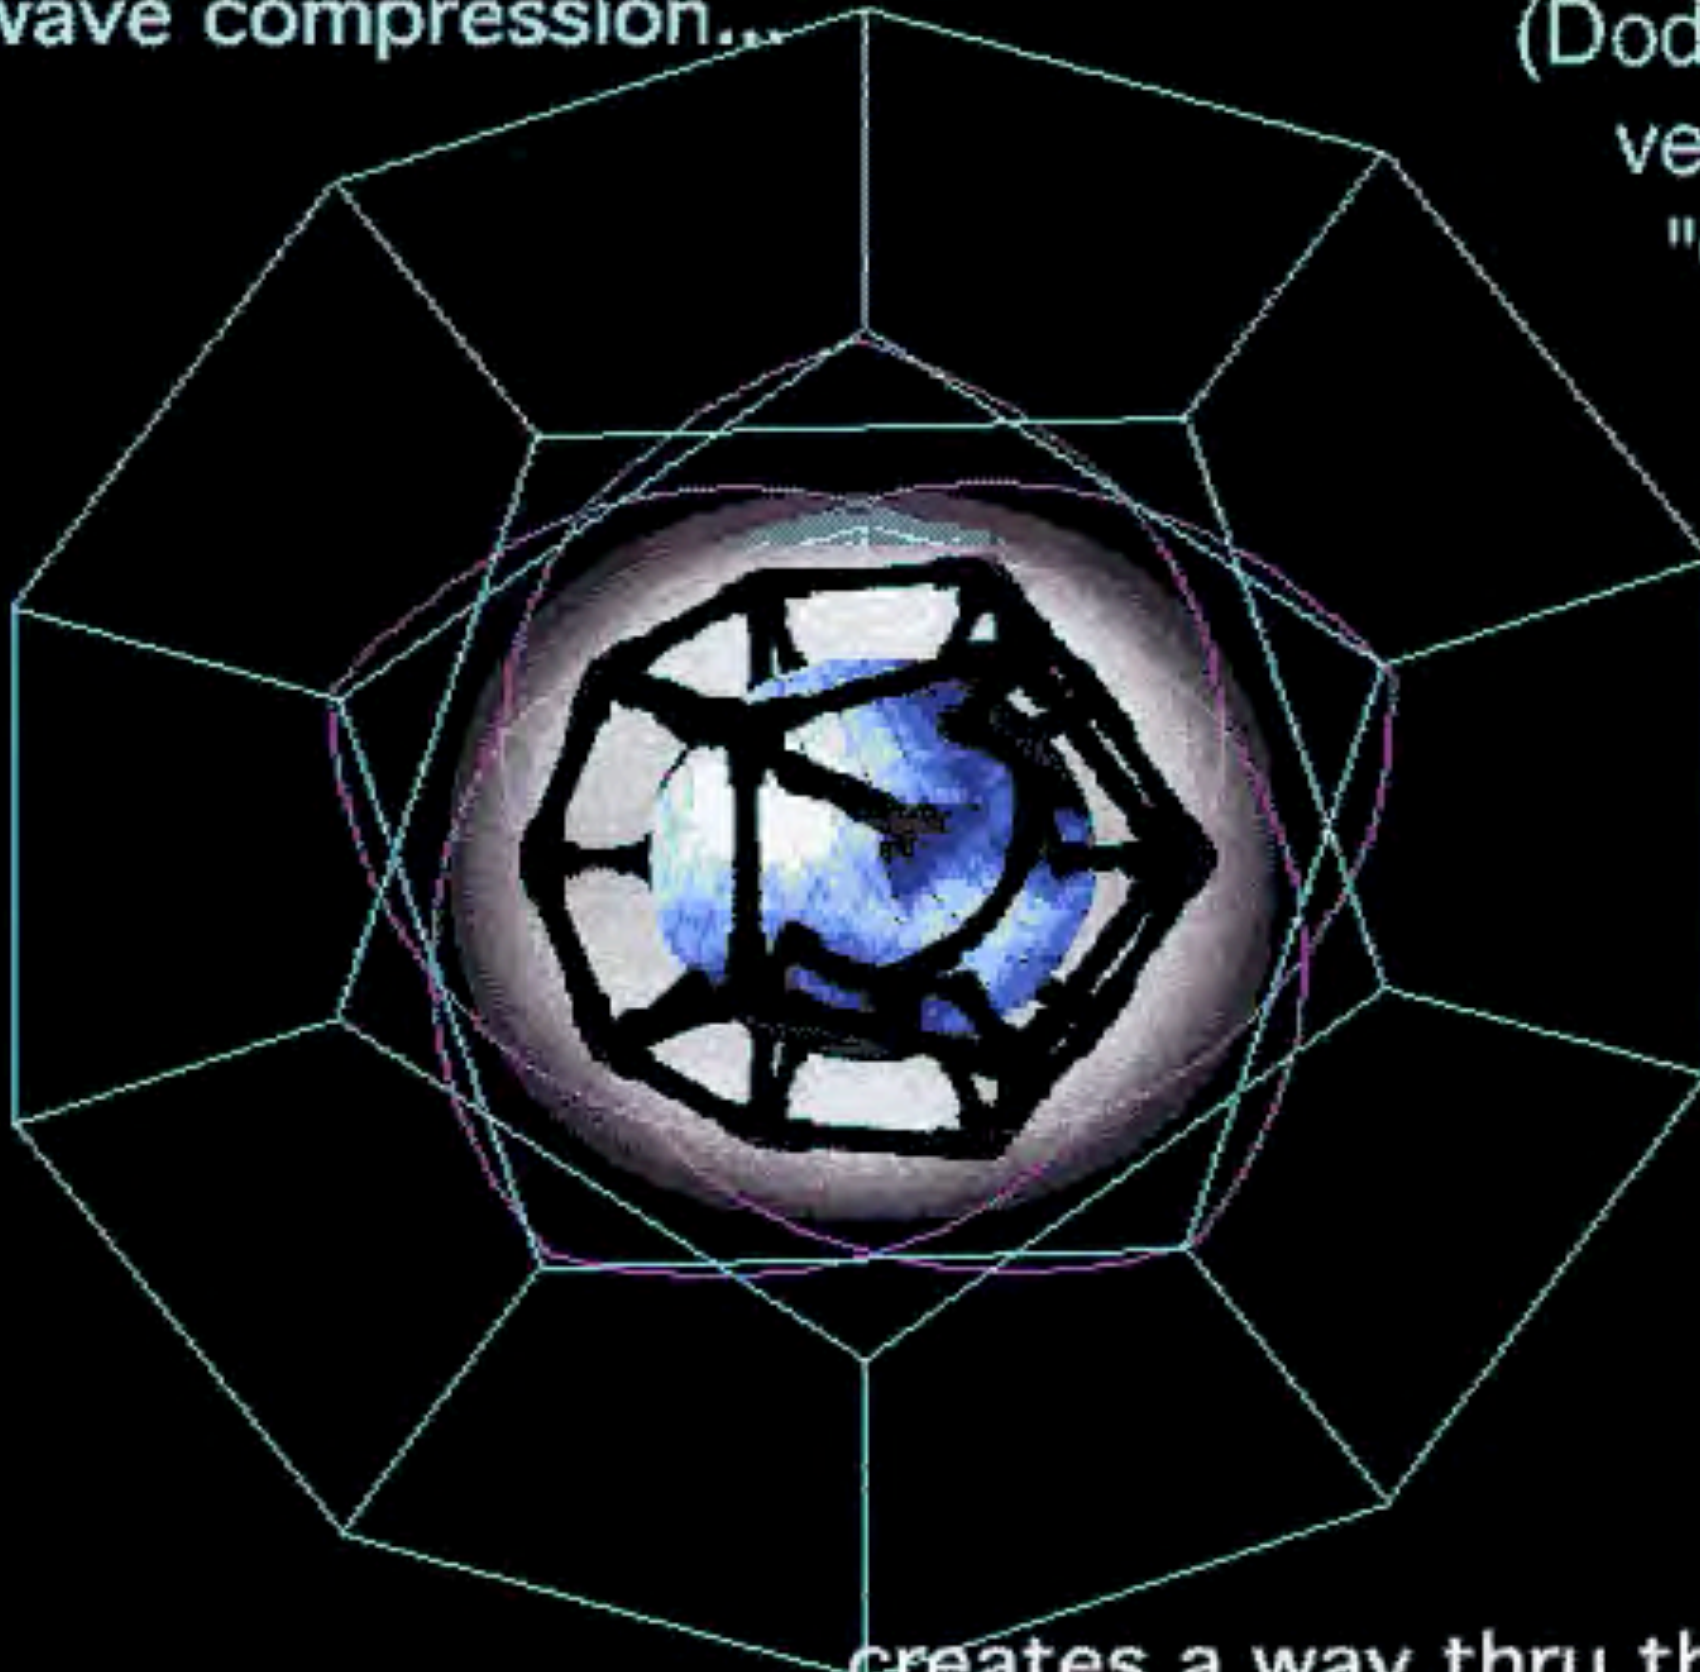

"The AWAKENED MIND brainwave pattern combines the intuitive, empathetic radar of the delta waves, the creative inspiration, personal insight, and spiritual awareness of the theta waves, the bridging capacity and relaxed, detached, awareness of the alpha waves, and the external attention and ability to consciously process thought of beta waves, all at the same time. It is a brainwave pattern shared by people in higher states of consciousness regardless of their philosophy, theology or meditation technique. This brainwave pattern can be found during "peak experience" and in all forms of creativity and high performance. The awakened mind is also the "ah-ha," appearing at the exact instant of solving the problem, or getting the insight."
